University Rankings, Diversity, and the New Landscape of Higher Education, 2019-02-18 University rankings are a relatively new phenomenon in higher education. Although quite an established practice in the U S it is only within the last decade that attempts to analyse university performance have spread to the rest of the world and that we also have seen new global rankings appear. Rankings attempting to measure university performance beyond national borders. No wonder that this trend is accompanied by a growing interest in studying rankings throughout the world. This book is written as part of the effort to better understand rankings and their effects on higher education. A serious approach towards university rankings implies that rankings should be analysed properly including the methods used and the indicators chosen and investigate the objectives claimed. If university rankings are considered as consumer information then everyone should have an interest in basing such guidance on valid and reliable data and methodology. A serious analysis should also discuss the wider implications of rankings as an emerging phenomenon in higher education. Consequently the contributions to this book investigate and analyse how different rankings work how they reach their conclusions and on what data and methodology they are built. Furthermore it provides a critical reflection about the impact of rankings on higher education how and in what way rankings influence policy making the structure of the sector or the internal life of the sector. *The Best Southeastern Colleges* Princeton Review (Firm), 2003 The Truth About Colleges from the REAL Experts Current College Students Inside this book you ll find profiles of 100 great colleges in the Southeast including schools you ve heard about and great colleges that aren t as widely recognized. There is simply no better way to learn about a college than by talking to its students so we asked thousands of them to speak out about their schools. Sometimes hilarious often provocative and always telling the students opinions will arm you with rare insight into each college s academic load professors libraries dorms social scene and more. University Rankings William Yat Wai Lo, 2014-02-17 This book adopts a qualitative case study approach to provide the readers with a systematic delineation and interpretation of the implications of the university ranking phenomenon for Taiwan s higher education system. It reviews the literature on different theories concerning the global transformation of higher education and presents basic information on higher education in Taiwan. The author develops a four dimensional framework for the analysis of the ranking phenomenon in the island state. First the technological ecological dimension aims to look into how the rankings have impacted Taiwan s higher education based on empirical findings from five Taiwanese public universities. Next the technological geographical dimension examines how Taiwan can use rankings to promote its interests in global higher education. The two conceptual dimensions focus on the relationship between the rankings and power in higher education. They show how the phenomenon can be read and explained through theoretical lenses from ecological and geographical perspectives. From an ecological perspective the empirical evidence suggests that the influence of rankings varies throughout the academic hierarchy in Taiwan. The theoretical analysis then illustrates the relationship

between the ranking phenomenon and the power structure in academic hierarchy Geographically while the empirical analysis is based on data from Taiwan the theoretical analysis offers essential insights that help readers to understand the changing global landscape of higher education and its implications in East Asia

human history In 2015 the UN Member States adopted the 17 SDGs as a framework that would help address the challenges being faced by humanity From eradicating poverty ending hunger providing universal access to healthcare and education and addressing climate change to the partnering of individuals communities and nation states to achieve global goals Yet the framers of the 2030 agenda forgot to dedicate one goal focused on the role of communication in achieving the SDGs It is nearly impossible to achieve the SDGs without the articulation and embrace of the role of communication in development Today development has become a communication issue and communication is a development issue How could such a vital pillar of life be missing in the UN s Sustainable Development Goals Volume 1 provides an overview of what the contributors have termed as the missing link between existing SDGs Communication for All *Visiting College Campuses* Janet Spencer,Sandra Maleson,2004-04-06 Includes profiles of 299 colleges and universities Cover **Breaking Ranks** Colin Diver,2022-04-12 Some colleges will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America s colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality **Public Higher Education That Works** Mitchel B. Wallerstein,2024 Discover how one public higher education institution was able to succeed despite the many obstacles and challenges that it faced This is the story of how and why Baruch College of The City University of New York became a positive outlier overcoming serious financial constraints physical space limitations and other difficulties to be highly ranked academically and financially stable During a tumultuous time for public higher education Baruch has graduated tens of thousands of smart and striving individuals the majority of whom were the first in

their family ever to attend college with little or no educational debt As the former president of the college Mitchell Wallerstein analyzes the lessons learned and he identifies the specific factors that explain Baruch's success He addresses the question of whether there is anything unique about Baruch's approach a secret sauce so to speak that accounts for its academic success and financial strength and he considers whether the Baruch model can be replicated by other public institutions

Book Features Reviews the history of public higher education its development in the state of New York and the important role it has played in the economic development of the United States Presents a unique comparative analysis of 15 public higher education institutions in 6 states across the country comparing their strengths and standing in relation to one another and to Baruch College Explores the replicability and sustainability of the Baruch model in the context of other public higher education institutions across the country Reflects on the current and future challenges facing public higher education in the 21st century

Higher Education Accountability Robert Kelchen, 2018-02-27 The first comprehensive overview charting the accountability of higher education As the price tag of higher education continues to rise colleges and universities across the country are under increasing pressure to demonstrate their value Graded on numerous metrics including cost and ability to prepare students for the job market colleges must satisfy requirements from multiple stakeholders State and federal governments demand greater accountability Foundations and private donors as well as today's parents and students approach education with a consumer sensibility How can colleges navigate these pressures while trying to stay true to their missions and values In *Higher Education Accountability* Robert Kelchen delivers the first comprehensive overview of how colleges in the United States came to face such overwhelming scrutiny Beginning with the earliest efforts to regulate schools Kelchen reveals the rationale behind accountability and outlines the historical development of how federal and state policies accreditation practices private sector interests and internal requirements have become so important to institutional success and survival With so many diverse and conflicting entities holding colleges responsible for their performance the variety of accountability systems in play can have both intended and unintended consequences Immersed as they are in current debates about how best to respond to these pressures faculty and administrators will welcome this up to date and timely account which offers not only a look at current practices but also an examination of the future of accountability in American higher education

Taking Time Off Colin Hall, Princeton Review (Firm), 2003 Have you ever thought about taking time off to ride your bike across the United States conduct research in the Amazonian rain forest work on a presidential campaign build houses for the poor Tens of thousands of students each year take a break before or even during college to work travel volunteer or do something just plain different No matter what you may plan to do with your time away *Taking Time Off* shows you how to make the most of it Included are the inspiring stories of 26 students whose pursuits in their time away from school were fulfilling and enjoyable You'll find practical advice on every aspect of planning a break from researching your options and financing your leave to convincing your parents it's a

The New Global Universities Bryan Penprase, Noah Pickus, 2023-12-05 Reimagining higher education around the world lessons from the creation of eight new colleges and universities in Africa Asia the Middle East and North America Higher education is perpetually in crisis buffeted by increasing costs and a perceived lack of return on investment campus culture that is criticized for stifling debate on controversial topics and a growing sense that the liberal arts are outmoded and irrelevant Some observers even put higher education on the brink of death The New Global Universities offers a counterargument telling the story of educational leaders who have chosen not to give up on higher education but to reimagine it The book chronicles the development and

launch of eight innovative colleges and universities in Africa Asia the Middle East and North America describing the combination of intellectual courage entrepreneurial audacity and adaptive leadership needed to invent educational institutions today The authors both academic leaders who have been involved in launching ventures similar to the ones described offer a unique inside perspective on these efforts Bryan Penprase and Noah Pickus show how the founders of new colleges and universities establish distinctive brands in a sector dominated by centuries old institutions secure creative sources of funding attract stellar faculty and students and design appealing curriculums and campuses all while managing tradeoffs and setbacks balancing local needs and global aspirations and wrestling with challenges to academic freedom These new educational institutions include two universities in Asia and the Middle East built by well established American parent institutions others in Africa and North America that offer holistic reform from the ground up and leverage new technologies to lower costs and still others that adapted the American liberal arts model to Asian and African contexts Their experiences offer lessons for future founders of new universities and for those who want to renew and rejuvenate existing ones
