College Rankings Update Returns:

The Return of John Marshall Robert Reilly, 2005-03 Mrs Vince DeMarco a bar owner and single parent files a complaint with a congressman demanding to know why the federal government tolerates a state law prohibiting her son from earning a law license through an apprenticeship program the way John Marshall and Abraham Lincoln did She claimed the law in her son s state didn t make sense because seven of the fifty states permit law office apprenticeship programs that produce excellent attorneys according to several studies Why aren t such programs available in all states and why should her son suffer the needless expense of law school simply because of where he lives she wanted to know Mrs DeMarco explains her dilemma to Bill McNare an aging journalist living in a rooming house worried about money following a divorce and a career going nowhere under his new editors McNare becomes intrigued with the story after learning the state of Washington s four year apprenticeship program costs less than 10 000 total and is taught by practicing attorneys with at least ten years of experience If the states and the federal government are genuinely concerned about soaring student debt why don t they encourage such cost saving apprenticeship programs he wonders What McNare discovers about the higher educational system will shock surprise and sadden many readers

Breaking Ranks Colin Diver, 2022-04-12 Some colleges will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America s colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college

rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality

Never to Return: Brighton College's Fallen 1914-18
Max Usher, 2017-01-12 In the early summer of 1914 the headmaster of Brighton College Canon W R Dawson spoke to the school in chapel He called on every boy present to stand ready to sacrifice his life in defence of his country No shot had yet been fired in anger Austria's Archduke still lived few anticipated a European war and yet Brighton's headmaster seemed to sense the approaching clouds of conflict There were probably 280 boys in the Chapel that day By November 1918 many of them were dead some of the total of 149 Old Boys killed in the Great War Ten of them were still teenagers This book presents mini biographies of the School's former students killed in the First World War and serves as a fitting tribute to their bravery and fortitude

Metrics That Matter Zachary Bleemer, Mukul Kumar, Aashish Mehta, Chris Muellerleile, Christopher Newfield, 2023-03-21 Colleges sell themselves by the numbers rankings returns on investments and top ten lists but these often mislead prospective students What numbers should they really be paying attention to High school and college students are inundated by indicators and rankings supposedly designed to help them decide where to go to college and what to study once they arrive In Metrics That Matter coauthors Zachary Bleemer Mukul Kumar Aashish Mehta Chris Muellerleile and Christopher Newfield take a critical look at these metrics and find that many of the most popular ones are confusing misleading and most importantly easily replaceable by more helpful alternatives Metrics That Matter explores popular metrics used by future and current college students with chapters focusing on colleges return on investment university rankings average student debt average wages by college major and more Written for students their families and the counselors who advise them each chapter explains a common metric's fundamental flaws when used as a basis for making important educational decisions The authors then draw on decades of scholarship from many academic fields to pair each metric with a concrete recommendation for alternative information both qualitative and quantitative that would be more useful and meaningful for students to consider They emphasize that students should be thinking beyond solely using metrics when making college decisions students should focus on their intellectual and academic education goals not just vocational or monetary ones Students reliance on certain metrics has skewed universities away from providing high quality education and distorted the perception of higher education's purpose overemphasizing private financial returns over the broader economic and social benefits of universities This book aims to facilitate important student decisions while reorienting public perceptions of higher education's values and how universities should measure their own success
