Max Streaming Ai Overview This Week:

Media Management and Artificial Intelligence Alex Connock, 2022-11-18 This cutting edge textbook examines contemporary media business models in the context of Artificial Intelligence AI and digital transformation AI has dramatically impacted media production and distribution from recommendation engines to synthetic humans from video to text tools to natural language models AI is really the change agent of the media industry answered a natural language generation model when AI was asked about the subject of this book It will open incredible opportunities This book seeks to explore them The media is examined through four sections Principles maps business models and the key tools of AI Platforms covers distribution channels in Games Streamers Social Networks Broadcast and Digital Publishing Producers covers the engines of content making including Scripted Entertainment Factual Content Marketing Creators and Music Finally Pioneers covers emerging sectors of Podcasting Esports the Metaverse and other AI driven developments Then in each chapter a standard value creation model is applied mapping a single sector through development production distribution and monetisation Diverse case studies are analysed from India Nigeria South Korea South Africa France the Netherlands the US the UK Denmark and China around creative entrepreneurship revenue models profit drivers rights and emerging AI tools Questions are provided for each case whilst chapter summaries cement learning Applied and technology focused this text offers core reading for advanced undergraduate and postgraduates studying Media Management or the relationship between Entertainment Media and Technology Online resources include chapter by chapter PowerPoint slides and an Instructor's Manual with further exercises and case studies

Public Relations and Strategic Communication in 2050 Alexander V. Laskin, Karen Freberg, 2024-11-25 Taking stock of the technological political economic and social trends that exist today this book extends the discussion to analyze and predict how these trends will affect the public relations and strategic communication industry of the future This book is divided into two sections the first addressing such key topics as artificial intelligence AI big data political polarization and misinformation the second looking at key facets of the profession such as media relations crisis communication and measurement and evaluation Leading researchers in the discipline share their analysis of these topics while also providing theoretically based and practically relevant insights on how the industry must evolve to keep up with and perhaps anticipate changes in culture society and technology This book will be of interest to scholars industry professionals and advanced undergraduate and graduate students in public relations and strategic communication

Personalization and Digital Social Markets Tahir M. Nisar, 2025-01-09 Tahir Nisar presents a cogent compelling account of recent developments and disruptions within the digital economy and particularly within the industrial and service sectors Through an original overarching framework rooted in the concept of personalization and its antecedents Nisar identifies radically new forms of relationships both economic and social among firms and customers These new relationships are driving major changes in commercial and industrial firms policies and practices and in turn in the entire

market economy E commerce trading user generated content virtual communities co creation influencer movements FinTech and sharing economies have strengthened the hands of consumers and have encouraged developments in cognitive technologies such as AI automation which in turn create new ways of working and disruptions to traditional capital labour relations Ultimately what emerges from this study is a picture of how digital technologies unleash forces of change that are creating new forms of social and economic sharing arrangements and new forms of social organization For its empirical depth and and theoretical rigor this book is essential reading for researchers and students interested in emerging alternative forms of economics business and management and particularly those interested in the digital economy and the state and future of capitalist markets Rock • Paper • Pixels Patrick Aievoli,2025-01-20 The purpose of this book is to avail faculty and students of the many different innovations events effects and back stories equated with the advent of this new era of communications and its impact on our world At our core we are a species that needs to communicate and to find a way to properly represent those messages Since the beginning of recorded history mankind has always attempted to communicate and to keep track of its endeavors and accomplishments Now by using interaction design and modern digital media it has become possible to present our story through many current and evocative platforms As each generation comes of age this new method is being utilized in all areas of their communication choices These new generations desire their communication at a different rate than its predecessors They want their information Internet ready and interactive They are involved in the immediate and that choice is not going away Interactive media is here to stay and has new rules and new effects It is changing our economies our societies and especially us as individuals The main goal of this book is to help you see how it started where it is going and how to be on the right side of this transformation How to take your first steps in that new direction and how to understand the effects of this new form of communication while being aware of its abilities and its dangers As a friend once said no matter how thin you slice it there are always two sides **Algorithms** ,2003
