Base-1 method: A structural-functional approach to word, sentence and discourse readability Bernd Nuss, 2018. Text readability is at the core of successful reading instruction and language learning. To counteract the challenges of complex reading content, text leveling is a vital necessity for readers with limited language access. A transdisciplinary analysis of reading development and linguistic interrelations builds the theoretical foundation of the base 1 method. This method focuses solely on structural and functional text elements on the word, sentence and cohesion level. But this book also discusses the significance of other prevalent readability factors such as the reader's language knowledge or socio cultural background. The base 1 method is designed to level early reading texts in German and other alphabetic languages. Experimental tests with a German immersion population has led to a preliminary calibration to demonstrate the validity of this approach. Bernd Nuss ist erfahrener Immersionslehrer in verschiedenen Programmen die sich ber Nord Zentral und S damerika erstrecken. An der E E Waddell Language Academy wirkt er schulintern als Immersion Facilitator, kooperiert mit Bildungsorganisationen und betreut die Praktika von Gaststudierenden an der Schule. Bernd Nuss has worked as an educator and facilitator in English and German language immersion programs all over the Americas and in Europe. In this capacity he has also been collaborating as a researcher with universities and other educational institutions in Europe, Asia and the USA.

African American, Creole, and Other Vernacular Englishes in Education John R. Rickford, 2013. More than 50 years of scholarly attention to the

intersection of language and education have resulted in a rich body of literature on the role of vernacular language varieties in the classroom. This field of work can be bewildering in its size and variety, drawing as it does on the diverse methods, theories, and research paradigms of fields such as sociolinguistics, applied linguistics, psychology, and education. Compiling most of the publications from the past half century that deal with this critical topic, this volume includes more than 1600 references: books, articles in journals or books, and web-accessible dissertations and other works on education in relation to African American Vernacular English (AAVE), English-based pidgins and creoles, Latino English, Native American English, and other English vernaculars such as Appalachian English in the United States and Aboriginal English in Australia, with accompanying abstracts for approximately a third of them. This comprehensive bibliography provides a tool useful for those interested in the complex issue of how knowledge about language variation can be used to more effectively teach students who speak a nonstandard or stigmatized language variety.
