Lewis, 2005-09-01 The disparity between rich and poor countries is the most serious intractable problem facing the world today The chronic poverty of many nations affects more than the citizens and economies of those nations it threatens global stability as the pressures of immigration become unsustainable and rogue nations seek power and influence through extreme political and terrorist acts To address this tenacious poverty a vast array of international institutions has pumped billions of dollars into these nations in recent decades yet despite this infusion of capital and attention roughly five billion of the world s six billion people continue to live in poor countries What isn t working And how can we fix it The Power of Productivity provides powerful and controversial answers to these questions William W Lewis the director emeritus of the McKinsey Global Institute here draws on extensive microeconomic studies of thirteen nations over twelve years conducted by the Institute itself to counter virtually all prevailing wisdom about how best to ameliorate economic disparity Lewis s research which included studying everything from state of the art auto makers to black market street vendors and mom and pop stores conclusively demonstrates that contrary to popular belief providing more capital to poor nations is not the best way to help them Nor is improving levels of education exchange rate flexibility or government solvency enough Rather the key to improving economic conditions in poor

countries argues Lewis is increasing productivity through intense fair competition and protecting consumer rights As *The Power of Productivity* explains this sweeping solution affects the economies of poor nations at all levels from the viability of major industries to how the average consumer thinks about his or her purchases Policies must be enacted in developing nations that reflect a consumer rather than a producer mindset and an attendant sense of consumer rights Only one force Lewis claims can stand up to producer special privileges consumer interests The Institute s unprecedented research method and Lewis s years of experience with economic policy combine to make *The Power of Productivity* the most authoritative and compelling view of the global economy today one that will inform political and economic debate throughout the world for years to come *The Best 361 Colleges* Robert Franek,Tom Meltzer,Christopher Maier,2006 110 000 college students currently in the trenches speak out about their colleges classes professors dorms social scenes sports and more **Federal Register** ,1973-12 **Billboard** ,1946-03-30 In its 114th year Billboard remains the world s premier weekly music publication and a diverse digital events brand content and data licensing platform Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music video gaming media digital and mobile entertainment issues and trends *Congressional Record* United States.
