are always informed about the news but aren't overwhelmed by it. They don't fear missing out because they already know which ones give them meaning and satisfaction. Newport gave a name to this quiet revolution and created a persuasive case of its importance in the world saturated in technology. He provides simple advice like turning off notification or even having a digital Sabbath for us to get our sense of control back into our lives. He envisions a society where we can unplug completely without experiencing the demands of family, friends, and work. What we need is a conscious method to decide what tools we need, the purpose of those tools, and the conditions under which we'll use them. Taking on diverse real-life examples from Amish communities to stressed parents to Silicon Valley programmers, Newport shares the common practices of digital minimalists with ideas underpinning them. He shows that digital minimalists rethink their relationship with technology, rediscover the beauty of the offline world, and reconnect with their inner selves through periods of solitude. He also shares some insights on how we can integrate those practices in our own lives, which starts with a thirty-day digital declutter. Technology is neither good nor bad. What we need is to use it to help our goals and values rather than allowing it to use us. Digital Minimalism shows us how. Wait no more, take action, and get this book now. *Good Morning Seye Kuyinu*, 2018-04-10

This book will take you through the practical steps to boosting your motivation everyday. In the case where you don't even have anything whatsoever to look up to, following some of these steps will put you in a vantage position to follow those things that you love. It always starts from somewhere. I hope it starts from this for you. I decided to put this book together not as a step 1, do this; step two, do that. But instead, I help you understand the physiology or psychology, whichever applies, why key principles work. I am very proud of the knowledge I have accumulated in this topic through practice, and I am willing and interested to go into even more advanced details through private consultations. Most of what I write about here are techniques and tips I learned from great minds like Benjamin P. Hardy, Arianna Huffington, Vishen Lakhiani, James Kwik, and Laura Silva.
