Proceedings of the 5th International Conference on Global Innovation and Trends in Economy 2024

(INCOGITE 2024) Soebowo Musa, Eric J. Nasution, Derek Ong Lai Teik, Hanny N. Nasution, Gilbert M. Tumibay, Amizawati

Mohd. Amir, Diena Mutiara Lenny, Sabrina O. Sihombing, 2024-12-11 This is an open access book The International

Conference on Global Innovation and Trends in Economy INCOGITE is the initiative of the Swiss German University SGU

Universitas Pelita Harapan UPH and Universitas Multimedia Nusantara UMN in collaboration with institutions professional

associations industries and partner universities in Indonesia and abroad INCOGITE aims to provide a collaborative platform

for scholars researchers and industry members for the advancement of the economic field **Quest for Space: The Indian**

Connect, 2014-02-15 Human endeavours in space over the past six decades have reached a stage that just about every facet

of human life today has some complement of space capability contributing to it encompassing the entire spectrum from

telecommunications navigation weather forecasting remote sensing broadcasting and disaster management Space

exploration actually owes its origins to matters military with civil applications coming about as a by product Capability

building in space thereafter has witnessed frenzied progress in the spheres of both the military and the civil commercial With

an ever increasing number of countries joining the space bandwagon space is getting congested and competitive

International legislation on space though well meaning is largely viewed to be inadequate to address the concerns of

equitable access to space and more alarmingly is reticent on the issue of militarisation and weaponisation The Indian

presence in the global space order is rather significant Ranking sixth globally in terms of space budget and technological ca

pability India is capable of going beyond its calling Its multi dimensional space programme spans almost the entire spectrum

from space launch to satellite construction and their employment in a large array of development centric applications and in

recent years in missions beyond the Earth The Mangalyaan mission to Mars currently underway symbolises India s

indigenous technological prowess and is a harbinger of its capability of cementing its status as a responsible space player at

the global level India thus stands today technologically robust and self reliant well poised in the global space order to look

beyond its domestic charter and address the concerns of the international global community Space legislation situational

awareness and international cooperation in space security are some of the geostrategic options analysed in this book which

could facilitate Indian positioning in the global space order **Literary News**, 1885 *Communication Technology Update*

and Fundamentals August E. Grant, Jennifer H. Meadows, 2016-11-03 Communication Technology Update and Fundamentals

has set the standard as the single best resource for students and professionals looking to brush up on how communication

technologies have developed grown and converged as well as what s in store for the future The 15th edition is completely

updated reflecting the changes that have swept the communication industries The first five chapters offer the communication

technology fundamentals including the ecosystem the history and structure then delves into each of about two dozen

technologies including mass media computers consumer electronics and networking technologies Each chapter is written by experts who provide snapshots of the state of each individual field Together these updates provide a broad overview of these industries as well as the role communication technologies play in our everyday lives In addition to substantial updates to each chapter the 15th edition includes First ever chapters on Big Data and the Internet of Things Updated user data in every chapter Projections of what each technology will become by 2031 Suggestions on how to get a job working with the technologies discussed The companion website www.tfi.com.ctu offers updated information on the technologies covered in this text as well as links to other resources

Green Innovation in China Joanna I Lewis, 2012-11-27 As the greatest coal producing and consuming nation in the world China would seem an unlikely haven for wind power Yet the country now boasts a world class industry that promises to make low carbon technology more affordable and available to all Conducting an empirical study of China's remarkable transition and the possibility of replicating their model elsewhere Joanna I Lewis adds greater depth to a theoretical understanding of China's technological innovation systems and its current and future role in a globalized economy Lewis focuses on China's specific methods of international technology transfer its forms of international cooperation and competition and its implementation of effective policies promoting the development of a home grown industry Just a decade ago China maintained only a handful of operating wind turbines all imported from Europe and the United States Today the country is the largest wind power market in the world with turbines made almost exclusively in its own factories Following this shift reveals how China's political leaders have responded to domestic energy challenges and how they may confront encroaching climate change The nation's escalation of its wind power use also demonstrates China's ability to leapfrog to cleaner energy technologies an option equally viable for other developing countries hoping to bypass gradual industrialization and the technological lock in of hydrocarbon intensive energy infrastructure Though setbacks are possible China could one day come to dominate global wind turbine sales becoming a hub of technological innovation and a major instigator of low carbon economic change
