Innovating in Practice Tiziana Russo-Spena, Cristina Mele, Maaria Nuutinen, 2016-11-13 The purpose of the book is to devise an alternative conceptual vocabulary for studying innovation by stressing the role of social, contextual, and cultural perspectives. This vocabulary is drawn on a service and on sociological perspectives on innovation based on the ontological assumption that innovation is a value co-creation matter and that it takes place in a reality that is multiple, constructed, and socially embedded. The aim is to tackle key issues such as social construction, service innovation, knowledge and learning processes, value co-creation, innovating and innovation activities, networking, and collaborative innovation.
