Apple Island Wife Fiona Stocker, 2018-12-04 What happens when you leave city life and move to five acres on a hunch with a husband who is an aspiring alpaca whisperer and a feral cockerel for company Can you eat the cockerel for dinner Or has it got rigor mortis In search of a good life and a slower pace Fiona Stocker upped sticks and moved to Tasmania a land of promise wilderness and family homes of uncertain build quality It was the lifestyle change that many dream of and most are too sensible to attempt Wife mother and now reluctant alpaca owner Fiona jumped in at the deep end Gradually Tasmania got under her skin as she learned to stack wood round up the kids with a retired lady sheepdog and stand on a scorpion without getting stung This charming tale captures the tussles and euphoria of living on the land in a place of untrammelled beauty raising your family where you want to and seeing your husband in a whole new light Not just a memoir but an everywoman's story and a paean to a new slower age

The Glocalization of Early Childhood Curriculum Philip Hui Li, Jennifer J. Chen, 2023-02-03 With empirical evidence and theoretical critique this book unveils the myths and debates e.g. child centeredness versus teacher directedness about early childhood curricula revealing their unique social cultural and historical roots Analyzing globally advocated early childhood curricula and ideologies such as the developmentally appropriate practice the child centered approach constructivism and globalized childhood this book argues that the direct adoption of these contextually bound approaches in local environments may be inappropriate if social and cultural compatibility is lacking The authors then examine how early childhood curricula may be implemented in a hybrid form Featuring case studies from American and Chinese contexts this book offers insights and recommendations for the future development and redeployment of early childhood curriculum studies and practices in a post truth era This volume serves as a valuable resource for scholars and students of early childhood education and comparative education as well as for key education stakeholders

Apple in China Patrick McGee, 2025-05-13 Phenomenal a jaw dropping book Jon Stewart The Daily Show Named by both The New York Times and The Economist as one of the best books of the year so far this scrupulously reported The New Yorker and astonishing The Daily Telegraph London book rivets with its portrayal of how Apple allowed itself to become dependent on China for a huge percentage of its manufacturing making it vulnerable and

unwittingly laying the groundwork for the Asian superpower to rival the US in technological expertise After struggling to build its products on three continents Apple was lured by China's seemingly inexhaustible supply of cheap labor Soon it was sending thousands of engineers across the Pacific training millions of workers and spending hundreds of billions of dollars to create the world's most sophisticated supply chain These capabilities enabled Apple to build the 21st century's most iconic products in staggering volume and for enormous profit Without explicitly intending to Apple built an advanced electronics industry within China only to discover that its massive investments in technology upgrades had inadvertently given Beijing a power that could be weaponized In *Apple in China* journalist Patrick McGee draws on more than two hundred interviews with former executives and engineers supplementing their stories with unreported meetings held by Steve Jobs emails between top executives and internal memos regarding threats from Chinese competition The book highlights the unknown characters who were instrumental in Apple's ascent and who tried to forge a different path including the Mormon missionary who established the Apple Store in China the Gang of Eight executives tasked with placating Beijing and an idealistic veteran whose hopes of improving the lives of factory workers were crushed by both Cupertino's operational demands and Xi Jinping's war on civil society *Apple in China* is the sometimes disturbing and always revelatory story of how an outspoken proud company that once praised rebels and troublemakers the company that encouraged us all to Think Different devolved into passively cooperating with a belligerent regime that increasingly controls its fate
