De Bosschere, E.H. D'Hollander, G.R. Joubert, 2012-05-09 Single processing units have now reached a point where further major improvements in their performance are restricted by their physical limitations This is causing a slowing down in advances at the same time as new scientific challenges are demanding exascale speed This has meant that parallel processing has become key to High Performance Computing HPC This book contains the proceedings of the 14th biennial ParCo conference ParCo2011 held in Ghent Belgium The ParCo conferences have traditionally concentrated on three main themes Algorithms Architectures and Applications Nowadays though the focus has shifted from traditional multiprocessor topologies to heterogeneous and manycores incorporating standard CPUs GPUs Graphics Processing Units and FPGAs Field Programmable Gate Arrays These platforms are at a higher abstraction level integrated in clusters grids and clouds The papers presented here reflect this change of focus New architectures programming tools and techniques are

also explored and the need for exascale hardware and software was also discussed in the industrial session of the conference This book will be of interest to all those interested in parallel computing today and progress towards the exascale computing of tomorrow Advances in Cyberology and the Advent of the Next-Gen Information Revolution Husain, Mohd

Shahid,Faisal, Mohammad,Sadia, Halima,Ahmad, Tasneem,Shukla, Saurabh,2023-06-27 The past decade has witnessed a leap in the cyber revolution around the world Significant progress has been made across a broad spectrum of terminologies used in the cyber world Various threats have also emerged due to this cyber revolution that requires far greater security measures than ever before In order to adapt to this evolution effectively and efficiently it calls for a better understanding of the ways in which we are ready to embrace this change Advances in Cyberology and the Advent of the Next Gen Information Revolution creates awareness of the information threats that these technologies play on personal societal business and governmental levels It discusses the development of information and communication technologies ICT their connection with the cyber revolution and the impact that they have on every facet of human life Covering topics such as cloud computing deepfake technology and social networking this premier reference source is an ideal resource for security professionals IT managers administrators students and educators of higher education librarians researchers and academicians **Maximum**

Antonietti,2021-03-27 This book presents the latest knowledge of the newly discovered Earth like exoplanets and reviews improvements in both radio and optical SETI A key aim is to stimulate fresh discussion on algorithms that will be of high value in this extremely complicated search Exoplanets resembling Earth could well be able to sustain life and support the evolution of technological civilizations but to date all searches for such life forms have proved fruitless The failings of SETI observations are well recognized and a new search approach is necessary In this book different detection algorithms that exploit state of the art low cost and extremely fast multiprocessors are examined and compared Novel methods such as the agnostic entropy and high sensitivity blind signal extraction algorithms should represent a quantum leap forward in SETI The book is of interest to all researchers in the field and hopefully stimulates significant progress in the search for extraterrestrial intelligence *24 Topic-wise CLAT & AILET (2013 - 2024) Previous Year Solved Papers 7th Edition |*

Common Law Admission Test PYQs | Must for SLAT, LLB Law Exams Disha Experts,2024-03-28 The updated and revised 7th Edition of the book 24 Topic wise CLAT AILET 2013 2024 Previous Year Solved Papers consists A total of 24 Question Papers from the past 12 years 2013 2024 divided into 5 sections English Including Comprehension Elementary Mathematics Logical Reasoning General Knowledge Legal Aptitude The coverage of the papers includes CLAT NLU and AILET from 2013 to 2024 as they actually reflect the pattern of the Law exams Practicing these questions aspirants will come to know about the

pattern and toughness of the questions asked in the examination In the beginning this book provides the last 6 years' trend analysis of CLAT AILET In the end this book will make the aspirants competent enough to crack the uncertainty of success in the Entrance Examination The strength of the book lies in the originality of its question papers and Errorless Solutions The solution of each and every question is provided in detail step by step so as to provide 100% concept clarity to the students

Exploring the DataFlow Supercomputing Paradigm Veljko Milutinovic, Milos Kotlar, 2019-05-27 This useful text reference describes the implementation of a varied selection of algorithms in the DataFlow paradigm highlighting the exciting potential of DataFlow computing for applications in such areas as image understanding, biomedicine, physics simulation and business The mapping of additional algorithms onto the DataFlow architecture is also covered in the following Springer titles from the same team: DataFlow Supercomputing Essentials: Research, Development and Education; DataFlow Supercomputing Essentials: Algorithms, Applications and Implementations; and Guide to DataFlow Supercomputing Topics and Features introduces a novel method of graph partitioning for large graphs involving the construction of a skeleton graph describes a cloud supported web based integrated development environment that can develop and run programs without DataFlow hardware owned by the user showcases a new approach for the calculation of the extrema of functions in one dimension by implementing the Golden Section Search algorithm reviews algorithms for a DataFlow architecture that uses matrices and vectors as the underlying data structure presents an algorithm for spherical code design based on the variable repulsion force method discusses the implementation of a face recognition application using the DataFlow paradigm proposes a method for region of interest based image segmentation of mammogram images on high performance reconfigurable DataFlow computers surveys a diverse range of DataFlow applications in physics simulations and investigates a DataFlow implementation of a Bitcoin mining algorithm This unique volume will prove a valuable reference for researchers and programmers of DataFlow computing and supercomputing in general Graduate and advanced undergraduate students will also find that the book serves as an ideal supplementary text for courses on Data Mining, Microprocessor Systems and VLSI Systems

Ray Tracing: A Tool for All Jon Peddie, 2019-08-08 This is the first book to offer a comprehensive overview for anyone wanting to understand the benefits and opportunities of ray tracing as well as some of the challenges without having to learn how to program or be an optics scientist It demystifies ray tracing and brings forward the need and benefit of using ray tracing throughout the development of a film product or building from pitch to prototype to marketing Ray Tracing and Rendering clarifies the difference between conventional faked rendering and physically correct photo realistic ray traced rendering and explains how programmer's time and backend compositing time are saved while producing more accurate representations with 3D models that move Often considered an esoteric subject the author takes ray tracing out of the confines of the programmer's lair and shows how all levels of users from concept to construction and sales can benefit without being forced to be a practitioner It treats both theoretical and practical aspects of the subject as well as giving

insights into all the major ray tracing programs and how many of them came about It will enrich the readers understanding of what a difference an accurate high fidelity image can make to the viewer our eyes are incredibly sensitive to flaws and distortions and we quickly disregard things that look phony or unreal Such dismissal by a potential user or customer can spell disaster for a supplier producer or developer If it looks real it will sell even if it is a fantasy animation Ray tracing is now within reach of every producer and marketeer and at prices one can afford and with production times that meet the demands of today s fast world

Big Data and Machine Learning in Quantitative Investment Tony Guida,2018-12-12 Get to know the why and how of machine learning and big data in quantitative investment Big Data and Machine Learning in Quantitative Investment is not just about demonstrating the maths or the coding Instead it s a book by practitioners for practitioners covering the questions of why and how of applying machine learning and big data to quantitative finance The book is split into 13 chapters each of which is written by a different author on a specific case The chapters are ordered according to the level of complexity beginning with the big picture and taxonomy moving onto practical applications of machine learning and finally finishing with innovative approaches using deep learning Gain a solid reason to use machine learning Frame your question using financial markets laws Know your data Understand how machine learning is becoming ever more sophisticated Machine learning and big data are not a magical solution but appropriately applied they are extremely effective tools for quantitative investment and this book shows you how

Accelerate Model Training with PyTorch 2.X Maicon Melo Alves,2024-04-30 Dramatically accelerate the building process of complex models using PyTorch to extract the best performance from any computing environment Key Features Reduce the model building time by applying optimization techniques and approaches Harness the computing power of multiple devices and machines to boost the training process Focus on model quality by quickly evaluating different model configurations Purchase of the print or Kindle book includes a free PDF eBook Book DescriptionThis book written by an HPC expert with over 25 years of experience guides you through enhancing model training performance using PyTorch Here you ll learn how model complexity impacts training time and discover performance tuning levels to expedite the process as well as utilize PyTorch features specialized libraries and efficient data pipelines to optimize training on CPUs and accelerators You ll also reduce model complexity adopt mixed precision and harness the power of multicore systems and multi GPU environments for distributed training By the end you ll be equipped with techniques and strategies to speed up training and focus on building stunning models What you will learn Compile the model to train it faster Use specialized libraries to optimize the training on the CPU Build a data pipeline to boost GPU execution Simplify the model through pruning and compression techniques Adopt automatic mixed precision without penalizing the model s accuracy Distribute the training step across multiple machines and devices Who this book is for This book is for intermediate level data scientists who want to learn how to leverage PyTorch to speed up the training process of their machine learning models by employing a set of optimization strategies and techniques To make the most of
