Pros

✓ Traction performance. Top-tier or close to. Reportedly even
handles dusty courts very well.

Cons

✗ Inflexible midsole. Fails to bend naturally at the toe joint
even after considerable breaking-in. As a result, some users
even reported heel-slippage.
✗ Overly thick insoles. Leads to a reduced sense of court-feel.
Swapping out for more practical insoles may require choosing
a different size.

Designing for Democracy Jennifer Forestal, 2022 How should we fix digital technologies to support democracy instead of undermining it In *Designing for Democracy* Jennifer Forestal argues that accurately evaluating the democratic potential of digital spaces means studying how the built environment a primary component of our modern public square structures our activity shapes our attitudes and supports the kinds of relationships and behaviors democracy requires While many scholars and practitioners are attentive to the role of design in shaping behavior they have yet to fully engage with the question of what structures are required to support democratic communities and how to build them Forestal closes this gap by providing a new theory of democratic space Drawing from a wide range of disciplines including architecture psychology and the history of political thought she argues that democratic spaces must be designed with three environmental characteristics boundaries durability and flexibility that taken together afford users the ability to engage in fundamental civic practices Through extended analyses of Facebook Twitter and Reddit Forestal shows precisely how well these digital platforms meet the criteria for democratic spaces or whether they do so at all The result is a more nuanced analysis of the democratic communities that form or fail to emerge in these spaces as well as more concrete suggestions for how to improve them In connecting the built environment digital technologies and democratic theory *Designing for Democracy* provides blueprints for democracy in a digital age

The Glass Cliff is a conversation about what happens when women break the rules and break through The Glass Ceiling. Every current and aspiring leader needs to read this book. Helen Tupper, Sarah Ellis, authors of *The Squiggly Career* and *You Coach You Clever*, brilliantly researched and vitally important. Dawn O'Porter, bestselling author of *The Cows* and *Cat Lady*. Have you ever wondered why there are so few success stories of women in business leadership? Or maybe you've wondered what life is really like on the other side of The Glass Ceiling? The world of work is supposedly changing, embracing diversity, yet are the opportunities we're giving to women really equal to those of men? Drawing on almost twenty years of research from around the world, *The Glass Cliff* phenomenon whereby women are often only hired in leadership roles when a business is already underperforming, meaning their chances of success are limited before they even start in the role, is well established but little known. Until now. This is the story of The Glass Cliff, a story of a structural inequality disguising itself as the personal failures of women. When Sophie Williams gave her viral TED talk on the subject, she was subsequently flooded with accounts of confident accomplished women who had taken what seemed like a dream leadership role only to quickly find themselves in a waking nightmare. Without the language to describe their experiences, they had been left blaming themselves. But learning about The Glass Cliff enabled them to reframe and reexamine what they'd gone through. Once we understand The Glass Cliff, once we can stand together and face it head first.

we can start to unravel so many other false narratives about women's leadership experiences that just don't make sense without it. By understanding the phenomenon and by telling one another about it we can affect the conversation, empower one another to overcome societal bias and ultimately change the world of work for women forever.

Environmental Policy Science's Exploration for Innovative Data Nicholas Guehlstorf, 2025-08-04. This edited volume discusses the use of nontraditional data sources in environmental political research and its implications for policymaking. Researchers involved in natural resource investigations and pollution control analysis must be entrepreneurial in finding and utilizing data sets to answer pressing policy questions. To remain relevant, successful researchers must increasingly seek data beyond routine federal program assessments, fragmented local surveys and limited stakeholder interactions. This volume surveys current environmental research that draws on emerging data sources such as social media and political discourse. It poses critical questions about the potential of creative and innovative analytical approaches, particularly in contexts where policymakers have disregarded objective evidence based social science on environmental challenges. By encouraging scholars to adopt new methods, research designs and data sources, this book offers valuable insights for researchers across the social and environmental sciences.
