Science James N. Druckman, Donald P. Green, 2021-04-01 Experimental political science has changed In two short decades it evolved from an emergent method to an accepted method to a primary method The challenge now is to ensure that experimentalists design sound studies and implement them in ways that illuminate cause and effect Ethical boundaries must also be respected results interpreted in a transparent manner and data and research materials must be shared to ensure others can build on what has been learned This book explores the application of new designs the introduction of novel data sources measurement approaches and statistical methods the use of experiments in more substantive domains and discipline wide discussions about the robustness generalizability and ethics of experiments in political science By exploring these novel opportunities while also highlighting the concomitant challenges this volume enables scholars and practitioners to conduct high quality experiments that will make key contributions to knowledge 1976 National Science Foundation Authorization, Hearings Before the Subcommittee on Science, Research and Technology Of..., 94-1, February 18, 19, 20, 21, 1975 United States. Congress. House. Science and Technology Committee, 1975 UNESCO science report UNESCO, 2015-11-09 There are fewer grounds today than in the past to deplore a North South divide in research and innovation This is one of the key findings of the UNESCO Science Report towards 2030 A large number of countries are now incorporating science technology and innovation in their national development agenda in order to make their economies less reliant on raw materials and more rooted in knowledge Most research and development R D is taking place in high income countries but innovation of some kind is now occurring across the full spectrum of income levels according to the first survey of manufacturing companies in 65 countries conducted by the UNESCO Institute for Statistics and summarized in this report For many lower income countries sustainable development has become an integral part of their national development plans for the next 10 20 years Among higher income countries a firm commitment to sustainable development is often coupled with the desire to maintain competitiveness in global markets that are increasingly leaning towards green technologies The quest for clean energy and greater energy efficiency now figures among the research priorities of numerous countries Written by more than 50 experts who are each covering the country or region from which they hail the UNESCO Science Report towards 2030 provides more country level information than ever before The trends and developments in science technology and innovation policy and governance between 2009 and mid 2015 described here provide essential baseline information on the concerns and priorities of countries that could orient the implementation and drive the assessment of the 2030 Agenda for Sustainable Development in the years to come USGS Research on Energy Resources, 1986 Lorna M.
