Debt-Equity Composition of International Investment International Monetary Fund, 1988-01-01 Capital flows to the nonindustrial countries share three striking characteristics First the bulk of these flows was in the form of debt not equity second the loans were mostly to or guaranteed by debtor governments and third these debts were largely bank loans not bonds This paper examines the economic factors that may have been responsible

Taxation and the Cost of Capital in Hungary and Poland International Monetary Fund, 1990-12-01 This paper compares the effective rates of taxation

faced by a representative investor located in a major capital exporting country for investments in machinery and buildings in nine capital importing European countries Poland and Hungary are found to have relatively high effective tax rates on equity financed investment The analysis suggests that both countries would benefit from streamlining capital cost recovery allowances and possibly lowering statutory corporate tax rates as permitted by the revenue constraint rather than providing tax preferences for foreign investors **The Taxation of Financial Assets** Mr. John R. King, Mr. Vito Tanzi, 1995-05-01

Taxes affect the degree and efficiency of financial intermediation in many different ways This paper summarizes the main tax provisions in OECD countries that affect the overall tax wedge between pre tax returns on investments and the post tax yield on the savings that finance them This tax wedge is shown to vary widely in individual countries according to the different ways in which savings are channeled through financial markets The paper then discusses alternative criteria for assessing tax regimes for financial assets and summarizes recent trends in OECD countries **Gewinnverkürzung und**
