Fast Fashion Costs Jacob Smith,AI,2025-05-05 Fast Fashion Costs uncovers the hidden environmental and social price tags attached to trendy inexpensive clothing It explores how the rapid production cycle fuels environmental degradation through intensive resource use pollution from textile dyeing and massive textile waste Did you know that cotton farming s heavy reliance on water and pesticides contributes significantly to environmental damage Or that synthetic fabrics add to the problem as they are non biodegradable and increase carbon footprint The book also sheds light on labor exploitation in garment factories globally where workers face low wages and unsafe conditions The pursuit of low prices often destabilizes local economies perpetuating poverty and economic imbalances This book highlights that the fast fashion model is unsustainable and socially unjust presenting a critical analysis of the industry s impacts and a call for ethical consumerism and responsible practices The book progresses across chapters that thoroughly investigate environmental degradation ethical labor concerns and economic imbalances presenting facts and analysis to support its central argument

The Return of Industrial Policy in Data Simon Evenett,Adam Jakubik,Fernando Martín,Michele Ruta,2024-01-04 This paper introduces the New Industrial Policy Observatory NIPO dataset and documents emergent patterns of policy intervention during 2023 associated with the return of industrial policy The data show that the recent wave of new industrial policy activity is primarily driven by advanced economies and that subsidies are the most employed instrument Trade restrictions on imports and exports are more frequently used by emerging market and developing economies Strategic competitiveness is the dominant motive

governments give for these measures but other objectives such as climate change resilience and national security are on the rise In exploratory regressions we find that implemented measures are correlated with the past use of measures by other governments in the same sector pointing to the tit for tat nature of industrial policy Furthermore domestic political economy factors and macroeconomic conditions correlate with the use of industrial policy measures We intend for the NIPO to be a publicly available resource to help monitor the evolution and effects of industrial policies

Solutions **Watershed** Anika Gauja,Marian Sawyer,Jill Sheppard,2023-08-10 Australia s 2022 federal election played out in
ways that few could have expected Not only did it bring a change of government it also saw the lowest number of primary
votes for the major parties and the election of the greatest number of Independents to the lower house since the formation of
the Australian party system The success of the Teal Independents and the Greens along with the appetite voters showed for
doing politics differently suggested that the dominant model of electoral competition might no longer be the two party
system of Labor versus Liberal At the very least the continued usefulness of the two party preferred vote as a way of
conceptualising and predicting Australians voting behaviour has been cast into serious doubt In Watershed leading scholars
analyse the election from the ground up focusing on the campaign issues the actors involved and the successes and failures
of campaign strategy and show how digital media visual politics and fake news are changing the way politics is done Other
topics include the impact of COVID 19 and the salience of climate gender and integrity issues as well as voting patterns and
polling accuracy This authoritative book is indispensable for understanding the disenchantment with the major parties the
rise of Community Independents and the role of the Australian Greens and third parties Watershed is the eighteenth in the
ANU Press federal election series and the tenth sponsored by the Academy of the Social Sciences in Australia
