The Health Reformer,1871 *The Last Great Walk* Wayne Curtis,2014-09-09 In 1909 Edward Payson Weston walked from New York to San Francisco covering around 40 miles a day and greeted by wildly cheering audiences in every city The New York Times called it the first bona fide walk across the American continent and eagerly chronicled a journey in which Weston was beset by fatigue mosquitoes vicious headwinds and brutal heat He was 70 years old Using the framework of Weston's fascinating and surprising story journalist Wayne Curtis investigates exactly what we lost when we turned away from foot travel and what we could potentially regain with America's new embrace of pedestrianism From how our brains and legs evolved to accommodate our ancient traveling needs to the way that American cities have been designed to cater to cars and discourage pedestrians Curtis guides readers through an engaging intelligent exploration of how something as simple as the way we get from one place to another continues to shape our health our environment and even our national identity Not walking he argues may be one of the most radical things humans have ever done **The Ultimate Guide to**
