Science Experiments Near Me Setup:

The Aesthetics of Scientific Experiments Milena Ivanova,Alice Murphy,2023-06-16 The relationship between aesthetics and science has begun to generate substantial interest However for the most part the focus has been on the beauty of theories and other aspects of scientific practice have been neglected This book offers a novel perspective on aesthetics in experimentation via ten original essays from an interdisciplinary group comprised of philosophers historians of science and art and artists The collection provides an analysis of the concept of beauty in the evaluation of experiments What properties do practising experimenters value How have the aesthetic properties of scientific experiments changed over the years Secondly the volume looks at the role that aesthetic factors including negative values such as ugliness as well as experiences of the sublime and the profound play in the construction of an experiment and its reception Thirdly the chapters provide in depth historical case studies from the Royal Society which also allows for a study of the depiction of scientific experiment in artworks as well as contemporary examples from the Large Hadron Collider and cases of experiments designed by artificial intelligence Finally it offers an exploration of the commonalities between how we learn from experiments on the one hand and the cognitive value of artworks on the other The Aesthetics of Scientific Experiments will be of interest to researchers and advanced students working in philosophy and history of science philosophy and history of art as well as practising scientists and science communicators

Science Experiments Tricia Dearborn,2002 Provides clear explanations of the science behind the experiments and a handy list of basic materials and equipment

Policy Research in Educational Settings Jenny Ozga,1999-11-16 This book argues for independent critical research on education policy in the context of attacks on the quality and usefulness of educational research in general It takes issue with the argument promoted by government departments and agencies that education policy research should be limited to work that assists policy makers Against this position the book advocates independent critical research that scrutinizes policy in relation to its consequences for equality and social justice It argues that practitioners and academic researchers should form a research community that develops its own knowledge base from which so called evidence based policymaking in education may be assessed and challenged The book offers guidance on the theoretical and methodological resources available to practitioners and others with an interest in doing research on policy and discusses some of the main issues and problems in doing policy research on education It offers examples of research on policy at different system levels pursuing themes such as globalization changing governance of education selection choice and exclusion managerialism and the feminisation of educational management It argues for attention to the history of policy in education as a resource for understanding the present and concludes with recommendations for future research in areas where contestation of official agendas is needed
