not expect the outbreak of a fatal disease that was going to shake the roots of our society The appearance of the human immunodeficiency virus HIV 1 in the early 80 s has prompted a unique re search impetus in the area of Medical Virology The knowledge that we are gaining in our attempt to understand the biology of HIV 1 and the immuno logical response to this virus should not only help us control the spread of this virus but should also help us to better understand other viral infections Let us hope that during the 1990 s we can learn how to control HIV 1 infections so that by the end of the decade no more human lives succumb to an infection with this virus Luis M de la Maza Irvine California Ellena M Peterson March 1990 v
