Summary of Activities of the Committee on Science, U.S. House of Representatives for the One Hundred Fourth Congress United States. Congress. House. Committee on Science, 1997 **Summary of Activities of the Committee on Science, U.S. House of Representatives for the ... Congress** United States. Congress. House. Committee on Science, 1997 Medical Technology in Japan Christa Altenstetter, 2017-09-08 Japan is suffering from a device gap Compared to its American and European counterparts Japan lags in adopting innovative medical devices and making new treatments and procedures available to its patients Many blame its government and bureaucracy for Japan's delayed access to modern medicine and new medical devices Christa Altenstetter examines the contextual social historical and political conditions of Japan's medical field to make sense of the state of the country's medical profession and its regulatory framework She explores the development of regulatory frameworks and considers possibilities for eventual reform and modernization More specifically Altenstetter looks into how physicians and device companies connect to the government and bureaucracy the relationships connecting Japanese patients to their medical system and governmental bureaucracy and how the relationships between policymakers and the medical profession are changing The issues addressed here are becoming increasingly relevant as numerous countries in Asia Latin America and Central and Eastern Europe are only now beginning to regulate medical technology following the lead of the US and the European Union Those interested in global medicine and Asian studies will find this book both informative and compelling Medical Technology Development and Commercialization United States. Congress,1995-01-04 *Commercial Aircraft Propulsion and Energy Systems Research* National Academies of Sciences, Engineering, and Medicine,Division on Engineering and Physical Sciences,Aeronautics and Space Engineering Board,Committee on Propulsion and Energy Systems to Reduce Commercial Aviation Carbon Emissions,2016-08-09 The primary human activities that release carbon dioxide CO₂ into the atmosphere are the combustion of fossil fuels coal natural gas and oil to generate electricity the provision of energy for transportation and as a consequence of some industrial processes Although aviation CO₂ emissions only make up approximately 2 0 to 2 5 percent of total global annual CO₂ emissions research to reduce CO₂ emissions is urgent because 1 such reductions may be legislated even as commercial air travel grows 2 because it takes new technology a long time to propagate into and through the aviation fleet and 3 because of the ongoing impact of global CO₂ emissions Commercial Aircraft Propulsion and Energy Systems Research develops a national research agenda for reducing CO₂ emissions from commercial aviation This report focuses on propulsion and energy technologies for reducing carbon emissions from large commercial aircraft single aisle and twin aisle aircraft that carry 100 or more passengers because such aircraft account for more than 90 percent of global emissions from commercial aircraft Moreover while smaller aircraft also emit CO₂ they make only a minor contribution to global emissions and many technologies that reduce CO₂ emissions for large aircraft also apply to smaller aircraft As commercial aviation continues to grow in terms of revenue passenger miles and cargo ton miles CO₂ emissions are expected to increase To reduce the contribution of aviation to climate change it is essential to improve the effectiveness of ongoing efforts to reduce emissions and initiate research into new approaches *Rules Adopted by the Committees of the House of Representatives* United States. Congress. House, Assessing Medical Technologies Institute of Medicine,Division of Health Promotion and Disease Prevention,Division of Health Sciences Policy,Committee for Evaluating Medical Technologies in Clinical Use,1985-02-01 New drugs new devices improved surgical techniques and innovative diagnostic procedures and equipment emerge rapidly But development of these technologies has outpaced evaluation of their safety efficacy cost effectiveness and ethical and social consequences This volume which is strongly recommended by The New England Journal of Medicine to all those interested in the future of the practice of medicine examines how new

discoveries can be translated into better care and how the current system's inefficiencies prevent effective health care delivery. In addition, the book offers detailed profiles of 20 organizations currently involved in medical technology assessment and proposes ways to organize U.S. efforts and create a coordinated national system for evaluating new medical treatments and technology.
