Meeting Community Needs A Practical Guide For Librarians Practical Guides For Librarians:

Meeting Community Needs Pamela H. MacKellar, 2015-12-15 Librarians must know how to provide essential programs and services that make a difference for the people they serve if libraries are going to survive. It is no longer realistic for librarians to rely on the idea that people love libraries so they will fund them in this economic climate. Librarians must be able to prove that their programs and services are making a difference if they want to compete for funding in their municipalities, schools, corporations, colleges, institutions, and organizations. *Meeting Community Needs: A Practical Guide for Librarians* presents a process that librarians of all kinds can use to provide effective programs and services. This requires being in close touch with your community, whether it is a city, town, or village, college or university, public or private school, or corporation, hospital, or business. Understanding what information people need, how they access it, how they use it, how it benefits them, and how they share it is paramount. The process in this book covers community assessment, designing programs and services to meet needs, implementing and evaluating programs and services, and funding options. Providing library programs and services for your entire population, not just library users, is more important than ever. Librarians working in libraries of all types must provide programs and services that meet community needs if libraries are to stay relevant and survive in the long run. Librarians must be able to measure their success and demonstrate the library's worth with verifiable proof if they are going to be competitive for available funds in the future. *Meeting Community Needs* will make you take a serious look at how well your library programs and services are meeting your community's needs, and it will show you the way to success.

Teaching Google Scholar Paige Alfonzo, 2016-07-25 Teaching Google Scholar in your library instructional sessions can increase students' information and digital literacy skills. Students' familiarity with Google Scholar's interface works to the instructor's advantage and allows more time to address students' information needs and teach foundational information literacy skills, and less time teaching a new database with a less intuitive database interface. *Teaching Google Scholar: A Practical Guide for Librarians* will illustrate instructional methods and incorporate step-by-step guides and examples for teaching Google Scholar. It begins with providing you with essential background: What Google Scholar is, How to set up Google Scholar using OpenURL, How to design Google Scholar instructional sessions, How to incorporate active learning activities using Google Scholar. After reading it, you will be ready to teach students critical skills including how to use specific Google Scholar search operators, Incorporate search logic, Extract citation data, generate citations, and save citations to Google's My Library and/or a citation management program. Use Google Scholar tools including cited by, alerts, library links, and library search. Google Scholar is a powerful research tool and will only become more popular in the coming years. Learning how to properly teach students how to utilize this search engine in their research will greatly benefit them in their college career and help promote life-long learning. Google Scholar instruction is a must in today's modern information literacy classroom. *Fundamentals of Collection Development and Management, Fourth Edition* Peggy

Johnson,2018-07-23 Technical Services Quarterly declared that the third edition must now be considered the essential textbook for collection development and management the first place to go for reliable and informative advice For the fourth edition expert instructor and librarian Johnson has revised and freshened this resource to ensure its timeliness and continued excellence Each chapter offers complete coverage of one aspect of collection development and management including numerous suggestions for further reading and narrative case studies exploring the issues Thorough consideration is given to traditional management topics such as organization of the collection weeding staffing and policymaking cooperative collection development and management licenses negotiation contracts maintaining productive relationships with vendors and publishers and other important purchasing and budgeting topics important issues such as the ways that changes in information delivery and access technologies continue to reshape the discipline the evolving needs and expectations of library users and new roles for subject specialists all illustrated using updated examples and data andmarketing liaison activities and outreach As a comprehensive introduction for LIS students a primer for experienced librarians with new collection development and management responsibilities and a handy reference resource for practitioners as they go about their day to day work the value and usefulness of this book remain unequalled **Serving Library Users from Asia** John
