Attachments API - FND_DOCUMENTS_PKG, FND_ATTACHED_DOCUMENTS_PKG

Working on attachments need some knowledge of how an attachment function (DefaultDoc, Entry, DocumentCategory, Entry and Block). Primary keys in attachments (entry_id) is Oracle Apps. To understand the below API and what it actually does its advisable to read the Attachments Chapter in Developer's Guide.

Primary Key information that uniquely identifies the product block as the product_id.

Below API takes a file from a shared drive and inserts into fnd_apps. Then its attached to a particular id (the order_id, invoice_id) using the combination of product_id, entry name and category. In this example I used PDF as attachment. Once the table fnd_document_datatypes will give with ext_attachment_type.

This sample shows how an attachment API works. You can use it to custom development to implement.
