Medication Management In Care Of Older People:

Medication Management in Care of Older People Maggi Banning, 2008-04-15 Medication Management in Care of Older People is an accessible introduction to medication management and its role in the management of older people and their medicines. It addresses key issues in medication management, evaluates professional roles and clinical practice initiatives, and explores healthcare policy and prescribing initiatives. This text explores the biology and neurobiology of ageing, pathological conditions such as Parkinson's and Alzheimer's disease, medication errors, issues of concordance, long-term conditions, and the older person. The principles of applied pharmacology and its relationship to older people. Medication Management in Care of Older People will be of interest to health care professionals who either have an interest in medication management and older people or who are qualified independent or supplementary prescribers and will enable them to comprehend the principles of applied pharmacology and medication management to enable them to use this knowledge in their daily practice. Illustrates the current issues, concerns, and approaches used to manage older people and their medicines. Builds on pertinent current policy and research initiatives including the NSF for Older People and Building a Safer NHS for Patients, the role of medication safety. Each chapter features case studies, learning outcomes, and implications for practice. I found this book to be interesting and highly relevant to OT practice. I would recommend this book as a learning resource to inform review and support clinical therapy practice. Occupational Therapists could well appreciate many of the contributory factors relating to medication problems with Older People; using this resource could raise own standards but also assist with reducing the negative impacts of medication issues on older people. Sarah Montgomery, A.E. Occupational Therapist and Communications Officer, COT Specialist Section, Older People, London, UK.

Medication Management in Older Adults Susan Koch, F. Michael Gloth, Rhonda Nay, 2010-08-14 Medication use is the predominant form of health intervention in our society. And as we age, the likelihood of medication use increases dramatically, with more than 80 percent of those over age 65 using one or more medications. Along with that, the potential for medication errors also increases. Indeed, adverse drug reactions (ADRs) and adverse drug events (ADEs) are a significant problem in older adults. Written in a practical format by contributors from Australia and the United States, *Medication Management in Older Adults: A Concise Guide for Clinicians* presents the available evidence on research interventions designed to reduce the incidence of medication errors in older adults, with a focus on acute, subacute, and residential long-term care settings. Because medication errors can occur at all stages in the medication process, from prescription by physicians to delivery of medication to the patient by nurses and in any site in the health system, it is essential that interventions be targeted at all aspects of medication delivery. Chapters cover the principles of medical ethics in relation to medication management, common medication errors in the acute care sector, medication management in long-term care settings, nutrition and medications, the outcomes of a systematic review, dose form alterations, Electronic Health Records (EHR), Computerized Order Entry (COE), Beers criteria, and pharmacokinetics and pharmacodynamics.

For those clinicians especially concerned with providing the best possible outcomes for their older adult patients Medication Management in Older Adults A Concise Guide for Clinicians is an invaluable resource and a significant contribution to the burgeoning literature on medication errors **Practical Old Age Psychopharmacology** Stephen Curran,Roger Bullock,2018-12-14 Tailoring mental illness drug treatments specifically for elderly people has been a neglected area This book brings together findings from recent multi disciplinary research and the practical aspects of old age psychiatry By taking into account the perspectives of the patient and their family the neuropathologist the pharmacist the nurse the GP and the specialist Practical Old Age Psychopharmacology provides a sympathetic analysis of contemporary practice and offers guidelines for the future Providing the only comprehensive overview of the topic the editors delve into the important role of psychotropic drugs and the management of mental illness in the elderly how these drugs should be used and how a truly personal approach to patient care can be maintained To provide a practical focus on specific clinical topics individual chapters can be used independently This book is an invaluable reference for old age psychiatrists psychiatrists in training hospital and community mental health nurses geriatricians general practitioners and pharmaceutical company staff Clinical psychologists social workers occupational therapists and health care managers will also find it beneficial as a complement to their own work **Supporting Older Persons on Their Aging Journey** Idevania Costa,Kristen Jones-Bonofiglio,2024-08-12 Supporting Older Persons on Their Aging Journey provides an emancipatory holistic patient centred and decolonizing approach to nursing practice for older persons and caregivers focusing on their unique needs and experiences Providing a general overview of aging and well being this text identifies trends in present nursing practice discusses the future of an aging population and seeks to create opportunities for individuals to live well with chronic conditions With a focus on collaboration and context as the keys to providing quality care that promotes health well being and safety the chapters discuss prevention strategies for successfully navigating life transitions The authors encourage learners to creatively and collaboratively consider opportunities to support older people their families and caregivers so they may thrive flourish maintain their dignity and fully define their own quality of life as they navigate the challenges of aging and illness This vital text is essential for nursing programs in universities and colleges within Canada intended for courses on older persons aging or gerontological nursing **Gerontologische Pflegeforschung** Martina Hasseler,Marttha Meyer,Thomas Fischer,2012-11-29 Die Anforderungen an eine hochwertige und individuenzentrierte Pflege Betreuung und Gesundheitsversorgung lterer Menschen sind stetig gestiegen Die Pflegewissenschaft kann mittlerweile einen gro en Fundus gerontologisch relevanter Forschungsergebnisse vorweisen Die Beitr ge des Buches leisten einen Beitrag zur Entwicklung Qualit t in der Pflege und zur Versorgung alter Menschen in allen Settings pflegerischer und gesundheitlicher Versorgung sowie zur Interdisziplinarit t des Forschungsfeldes **Palliative Care in Neurology, Volume II** Raymond Voltz,Marianne De Visser,David John Oliver,2022-03-11 *OECD Health Policy Studies Is Care Affordable for Older People?*

OECD,2024-10-29 With population ageing the demand for helping older people with daily activities so called long term care is set to increase across OECD countries by more than one third by 2050 Older people with long term care needs are more likely to be women 80 years old and above live in single households and have lower incomes than the average Currently across OECD countries publicly funded long term care systems still leave almost half of older people with care needs at risk of poverty particularly those with severe care needs and low income Out of pocket costs represent on average 70% of an older person s median income across the OECD This report suggests avenues to improve funding to make long term care systems better able to meet the demand for their services and suggests policy options to improve the targeting of benefits and seek efficiency gains to contain the costs of long term care
