Landscape Restoration Handbook, Second Edition Donald Harker, 1999-02-16

Five years after the first edition of *Landscape Restoration Handbook* was published, its natural landscaping and ecological restoration techniques have become standard and successful practice throughout the nation. Now the *Landscape Restoration Handbook, Second Edition* substantially widens the scope of the original work. Approximately 250 pages larger than the first edition, new and expanded chapters offer guidance on development of natural landscaping and ecological restoration programs, education, regional planning, and increased biological diversity. Ecological communities, species listings, scientific and common plant names associated with ecological communities, nurseries that propagate and sell native plants throughout the United States, naturalization, has proven to be a win-win situation all around. Monetary costs that landowners are saving on maintenance and chemicals also translates to environmental benefits for the greater community. Landscape and golf course architects, urban planners, horticulturists, golf course superintendents, and consultants have already put the *Landscape Restoration Handbook* to the test. Let the Second Edition bring you up to date on the numerous benefits of naturalization.

The Olmsted Parks of Louisville Patricia Dalton Haragan, 2014-03-18

Frederick Law Olmsted, popularly known as the Father of American Landscape Architecture, is famous for designing New York City's Central Park, the U.S. Capitol grounds, and the campuses of institutions such as Stanford University and the University of Chicago. His celebrated projects in Boston, Buffalo, Detroit, Milwaukee, and other cities led to a commission from the city of Louisville, Kentucky, in 1891. There, he partnered with community leaders to design a network of scenic parks, tree-lined parkways, elegant neighborhoods, and beautifully landscaped estate gardens that thousands of visitors still enjoy today. *The Olmsted Parks of Louisville* is the first authoritative manual on the 380 species of trees, herbaceous plants, shrubs, and vines populating the nearly 1,900 acres that comprise Cherokee, Seneca, Iroquois, Shawnee, and Chickasaw Parks. Designed for easy reference, this handy field guide includes detailed photos and maps, as well as ecological and historical information about each park. Author Patricia Dalton Haragan also includes sections detailing the many species of invasive plants in the parks and discusses the native flora that they displaced. This guide provides readers with a key to Olmsted's vision, revealing how various plant species were arranged to emphasize the beauty and grandeur of nature. It will serve as an essential resource for students, nature enthusiasts, and the more than ten thousand visitors who use the parks.
