Medieval Pharmacotherapy Continuity And Change Medieval Pharmacotherapy Continuity And Change:

Medieval Pharmacotherapy, Continuity and Change Helena M. Paavilainen, 2009 The development of medical drug therapy in medieval times can be seen as an interplay between tradition and innovation This book follows the changes in the therapy from the Arabic medicine of Ibn S n Avicenna to Latin medical scholasticism aiming to trace both the continuity and the development in the theory and practice of medieval drug therapy In this delicate balance between change and continuity a crucial role was played by the scientific community through critical rejection or acceptance of new ideas The drug choices were in most cases rational also from the point of view of contemporary medical theory The method used in the book for studying these choices could promote the development of a novel methodology for historical ethnopharmacology

 Using an innovative approach to evidence for the medieval hospital and medical practice this collection of essays presents
 new research by leading international scholars in creating a holistic look at the hospital as an environment within a social
 and intellectual context The research presented creates insights into practice medicines administration foundation regulation
 patronage theory and spirituality Looking at differing models of hospital administration between 13th century France and
 Spain social context is explored Seen from the perspective of the history of Knights of the Order of Saint Lazarus and Order
 of the Temple hospital and practice have a different emphasis Extant medieval hospitals at Tonnerre and Winchester become
 the basis for exploring form and function in relation to health theory spiritual and non spiritual as well as the influence of
 patronage and social context In the case of the Ospedale Maggiore in Milan this line of argument is taken further to
 demonstrate aspects of the building based on a concept of epidemiology Evidence for the practice of medicine presented in
 these essays comes from a variety of sources and approaches such as remedy books medical texts recorded practice and by
 making parallels with folk medicine Archaeological evidence indicates both religious and non religious medical intervention
 while skeletal remains reveal both pathology and evidence of treatment **Brill's Companion to the Reception of Galen**

Petros Bouras-Vallianatos, Barbara Zipser, 2019-03-27 Brill's Companion to the Reception of Galen presents a comprehensive account of the afterlife of the corpus of the second century AD Greek physician Galen of Pergamum. In 31 chapters written by a range of experts in the field it shows how Galen was adopted, adapted, admired, contested and criticised across diverse intellectual environments and geographical regions from Late Antiquity to the present day and from Europe to North Africa, the Middle and the Far East. The volume offers both introductory material and new analysis on the transmission and dissemination of Galen's works and ideas through translations into Latin, Syriac, Arabic, Hebrew and other languages; the impact of Galenic thought on medical practice as well as his influence in non-medical contexts including philosophy and alchemy.

Blood Matters Bonnie Lander Johnson, Eleanor Decamp, 2018-03-26 In late medieval and early modern Europe definitions of blood in medical writing were slippery and changeable blood was at once the red fluid in human veins a humor a substance governing crucial Galenic models of bodily change a waste product a cause of corruption a source of life a medical cure a serum appearing under the guise of all other bodily secretions and after William Harvey's discovery of its circulation the cause of one of the greatest medical controversies of the premodern period Figurative uses of blood are even more difficult to pin down The term appeared in almost every sphere of life and thought running through political theological and familial discourses Blood Matters explores blood as a distinct category of inquiry and draws together scholars who might not otherwise be in conversation Theatrical and medical practice are found to converge in their approaches to the regulation of blood as a source of identity and truth medieval civic life intersects with seventeenth century science and philosophy the concepts of class race gender and sexuality find in the language of blood as many mechanisms for differentiation as for homogeneity and fields as disparate as pedagogical theory alchemy phlebotomy wet nursing and wine production emerge as historically and intellectually analogous
