

JANUARY ... DOES IT BRING YOU JOY?

- 1 January is the time for renewal on many fronts. It's the time of the year to re-evaluate everything. If something or someone doesn't bring you joy, it's pretty pointless carrying on with it. If we want the best, we must do our best. We must keep our family space safe and secure so that we are thriving as a people and as a nation. 5
- 2 In order to live their best lives, people are spreading themselves thinner and thinner with multiple streams of income. In the process we earn more but live less, we lose our focus of what is important.
- 3 With social media, keeping up with other Instagrammers are having a devastating effect on self-perception. Everything appears to be real perfect, but the fabric of our society is frazzled. Use January to take stock and start navigating new ways of doing things. Instead of multiple streams of sole sessions, travel more, and connect with people and places that bring you joy. 10

and Offshore Structures Congress held in Cascais Portugal on 7th to 10th September 2015 The International Ship and Offshore Structures Congress ISSC is a forum for the exchange of information by experts undertaking and applying marine structural research The aim of *American Papermaker*, 1991 *Time and Power in Azraq Refugee Camp* Melissa Gatter, 2023-03-07 WINNER OF THE 2023 ALIXA NAFF PRIZE IN MIGRATION STUDIES The politics and governance of Jordan's Azraq camp for Syrian refugees Azraq refugee camp built in 2014 and host to forty thousand refugees is one of two official humanitarian refugee camps for Syrian refugees in Jordan Time and Power in Azraq Refugee Camp investigates the relationship between time and power in Azraq asking how a politics of time shapes limits or enables everyday life for the displaced and for aid workers Based on ethnographic fieldwork carried out during 2017-2018 the book challenges the perceptions of Azraq as the ideal refugee camp Melissa Gatter argues that the camp operates as a nine to five emergency where mundane bureaucratic procedures serve to sustain a power system in which refugees are socialized to endure a cynical wait both for everyday services and for their return without expectations for a better outcome Time and Power in Azraq Refugee Camp also explores how refugees navigate this system both in the day to day and over years by evaluating various layers of waiting as they affect refugee perceptions of time in the camp not only in the present but the past near future and far future Far from an ideal camp Azraq and its politics of time constitute a cruel reality in which a power system meant to aid refugees is one that suppresses foreclosing futures that it is supposed to preserve **The Digital Silk Road** David Gordon, Meia Nouwens, 2022-11-29 Concerns about China's ambitions to return to global centre stage as a great power have recently begun to focus on the Digital Silk Road DSR an umbrella term for various activities commercial and diplomatic of interest to the Chinese government in the cyber realm Part of or a spin off from the 2013 Belt and Road Initiative by 2020 the DSR had become a focal point of China's foreign policy But the DSR remains ill defined and poorly understood At the heart of such concerns is not that Chinese technology companies are becoming globally competitive but rather that Beijing could use them to rewire the global digital architecture from physical cables to code Dominance by Chinese technology could shift global norms from a free cyber commons to competing systems of cyber sovereignty or cyber freedom This Adelphi book brings together eight experts to examine the development of the DSR explore its impact on economics security and governance in recipient countries and assess the broader impact on patterns of economic and technological dependence on the emerging rules and norms of tech globalisation and on global geopolitics and great power relations Beijing has grasped the opportunity to leverage the entrepreneurial strengths of its private tech sector to gain prominence in the world's digital ecosystem But the more interventionist Beijing becomes the more Chinese firms will be seen as instruments of the state and the greater the pushback against Chinese technology and the DSR may be To achieve great power status and global centrality Beijing might ultimately need to change tack How it innovates in further rolling out Chinese tech across the world and what the DSR will then look like will have far reaching impacts on global economics politics and security **United**

Energy Transitions in Japan and China Tai Wei

Lim,2016-11-23 This volume focuses on the topic of energy transitions in the coal mining industries of China and Japan by adopting a Sino Japanese comparative approach in area studies to examine the experiences between the two major East Asian economies In China rapid industrialization led to dramatic growth in energy demand and much of this energy demand was fueled by affordable coal energy With growing social concerns about the environment and an increasingly vocal middle class in contemporary China the authorities and state owned enterprises are studying the use of coal fuels for its future development In Japan coal was also an affordable main source of energy for Japan s early post war heavy industrialization until it was gradually replaced by oil in the 1960s The oil shocks of the 1970s compelled Japan to look for cleaner and cheaper fuels including nuclear power In these energy transitions from coal to oil and then onto non fossil fuels the story of coal power in both countries is highlighted in this publication as a comparative study This volume is a crucial contribution to the discussion of China s energy reforms and required reading for scholars of climate change and society Monthly Catalog of United States Government Publications United States.
