referred for Western medical investigation or emergency medical treatment and also a guide to how patients can be safely supported in withdrawing from conventional medication when this is clinically appropriate Those wishing to use the text for systematic study can make use of the question and problem solving approach offered on the accompanying CD to which references to self study exercises appear at regular stages throughout the book This means that the text can be easily adapted to form the basis of a study course in clinical medicine for students of complementary medicine In addition to the self testing questions and answers the supporting CD also contains checklists for revision and full colour illustrations ABOUT THE AUTHOR Clare Stephenson is a qualified medical practitioner who worked in hospital medicine general practice and public health medicine for a number of years before training in Traditional Chinese Medicine TCM and acupuncture Over the course of a decade she developed and taught an undergraduate course for students of Chinese medicine on Western medicine and how it relates to TCM She is particularly committed to encouraging communication and understanding between practitioners of different health disciplines She currently works as a GP in Oxfordshire Approx 734 pages
