Melanins and Melanosomes Jan Borovansky, Patrick A. Riley, 2011-10-05 The surface pigmentation of vertebrates is controlled by specialized cells able to synthesize a variety of pigments collectively known as melanins Recent research has shown that melanins are produced not only in the skin but also in many other sites such as the eye inner ear muscles etc where they are engaged in some unanticipated roles The details of the synthetic pathway the complexities of its regulation and biological significance that have been unravelled in recent research comprise a fascinating story and are of key importance in understanding the nature of diseases including malignant melanoma one of the most rapidly spreading cancers

The Physics of Birds and Birding Michael Hurben, 2025-05-20 Birding has become one of the world's most popular pastimes for good reason The vibrant colors aerial finesse and vocal talents of birds draw us to nature stimulate our admiration and pique our curiosity We cannot help but have questions as we encounter these elegant creatures How do iridescent feathers seemingly glow What must a hummingbird do to hover How does a tiny animal produce all that music By what means do some birds sense Earth's magnetic field and use it for navigation Why is it that peering through a few pieces of glass can make a distant bird seem so close Such enquiry brings us to the realm of physics The Physics of Birds and Birding sets out to blaze the best possible trail through this landscape It steers clear complex technical specialization while avoiding overused paths that lead to unsatisfying facile explanations It is a guide not just to the fascinating science of birds and birding but to the deeper connections that tie all of nature together Birders and naturalists from all backgrounds will find much of interest here both in terms of mysteries they've long wondered about as well as some surprising linkages among what is seemingly unrelated This unique and remarkable book is an invitation to appreciate what you might not have been seeing all along
