The healing of pain is a great feeling, but it is difficult to appreciate how great it feels to be pain-free unless you have experienced an ongoing ache or pain. 2. I have treated pain associated with practically every disease, disorder, and chronic condition that has a name. I have helped clients get their lives back by helping them find their own path to healing. 3. Acute pain is caused by a one-time event or trauma that produces an acute injury with intense, sometimes excruciating pain. When you have an acute injury, you should immediately call your doctor or go to the emergency room. 4. The most common pre-pain symptoms are stiffness, soreness, throbbing, heaviness, tenderness, and tightness. If you experience these symptoms regularly for weeks or months, or one pre-pain symptom turns into three, you may have an illness or disease.
