Petersburg Julie A. Buckler, 2018-06-05 Pushkin's palaces or Dostoevsky's slums Many a modern day visitor to St Petersburg has one or more likely both of these images in mind when setting foot in this stage set like setting for some of the world's most treasured literary masterpieces What they overlook is the vast uncharted territory in between In *Mapping St Petersburg* Julie Buckler traces the evolution of Russia's onetime capital from a conceptual hierarchy to a living cultural system a topography expressed not only by the city's physical structures but also by the literary texts that have helped create it By favoring noncanonical works and underdescribed spaces Buckler seeks to revise the literary monumentalization of St Petersburg with Pushkin and Dostoevsky representing two traditional albeit opposing perspectives to offer an off center view of a richer less familiar urban landscape She views this grand city the product of Peter the Great's ambitious vision not only as a geographical entity but also as a network of genres that carries historical and cultural meaning We discover the busy messy middle ground of this hybrid city through an intricate web of descriptions in literary works nonfiction writings such as sketches feuilletons memoirs letters essays criticism and urban legends lore songs and social practices all of which add character and depth to this refurbished imperial city **Heaven and Earth Are Not Humane** Franklin Perkins, 2014-05-23

important also to realize that many basic psychological processes can be discerned in ostensibly different instances Research on role transitions has been dispersed across many different subdisci of the social sciences the problem can be investigated from several points of plines view and levels of analysis As modern societies become ever more complex role transitions can be expected to increase in number and diversity with a concomitant increase in detrimental consequences for the individual and society Hence for rea sons of both theory and practice improved conceptual models and new empirical data are needed The chapters in this book are the outcome of a N A T O symposium convened for the purpose of discussing aspects of role transitions from international and inter disciplinary perspectives The meeting was designed to be a working conference to facilitate as much intellectual exchange and debate among participants as possible *Learning in the Field* Gretchen B. Rossman, Sharon F. Rallis, 2012 The popular text that helped readers better understand and practice qualitative research has been completely updated and revised To help readers better visualize and grasp the concepts issues and complexities of qualitative inquiry the authors introduce each chapter with discussions among three characters students whose research projects demonstrate the challenges and excitement of qualitative research Woven into the chapters and the characters stories are three themes that make up the tapestry of qualitative research First research is a learning process Second research can and should be useful Finally a researcher needs to have a clear vision of the audience and purpose of a study
