[Polymer Fractionation](#) Manfred J. R. Cantow, 2013-10-22 Polymer Fractionation focuses on the processes reactions and transformations involved in polymer fractionation including chromatography titration and sedimentation The selection first offers information on theoretical considerations and fractional precipitation Topics include polydispersity of high polymers phase relations for polydisperse systems fractionation theory and efficiency and fractionation by solvent evaporation The manuscript then takes a look at fractional solution chromatographic fractionation and gel permeation chromatography The book elaborates on thermal diffusion and turbidimetric titration as well as methods of fractionation studies of the variables outline of the method and range of application and elaboration of the method The text then ponders on sedimentation isothermal diffusion and summative fractionation Discussions focus on mathematical interpretation of summative data experimental methods for the determination of diffusion constants and methods for the determination of the diffusion coefficient distribution The selection is a valuable source of information for readers interested in polymer fractionation

[Beyond the Psychometric Approach](#) Wolfgang Schoppek, Joachim Funke, Magda Osman, Annette Kluge, 2018-09-28 Complex

problem solving CPS and related topics such as dynamic decision making DDM and complex dynamic control CDC represent multifaceted psychological phenomena In abroad sense CPS encompasses learning decision making and acting in complex and dynamic situations Moreover solutions to problems that people face in such situations are often generated in teams or groups This adds another layer of complexity to the situation itself because of the emerging issues that arise from the social dynamics of group interactions This framing of CPS means that it is not a single construct that can be measured by using a particular type of CPS task e g minimal complex system tests which is a view taken by the psychometric community The proposed approach taken here is that because CPS is multifaceted multiple approaches need to be taken to fully capture and understand what it is and how the different cognitive processes associated with it complement each other Thus this Research Topic is aimed at showcasing the latest work in the fields of CPS as well as DDM and CDC that takes a holist approach to investigating and theorizing about these abilities The collection of articles encompasses conceptual approaches as well as experimental and correlational studies involving established or new tools to examine CPS DDM and CDC This work contributes to answering questions about what strategies and what general knowledge can be transferred from one type of complex and dynamic situation to another what learning conditions result in transferable knowledge and skills and how these features can be trained     **Paint Testing Manual** Sward,1972     The American Journal of the Medical Sciences ,1867
