sondern Lernende in den Mittelpunkt gestellt werden didaktische Dimensionen und Prinzipien konstruiert die für Unterrichtsmethoden eine handlungsanleitende Funktion übernehmen können Am Beispiel der 20 Unterrichtsmodelle von Karl Heinz Flehsig werden die Ergebnisse exemplarisch angewendet Im Rahmen dieser diskursiven Exploration werden über 130 Unterrichtsmethoden identifiziert und damit der innovative und heuristische Charakter der didaktischen Taxonomie demonstriert Ein Glossar sowie ein umfangreiches Sach- und Personenregister erleichtern den Zugriff und machen diesen Band zu einem vielseitig nutzbaren Werkzeug <http://www.peter.baumgartner.name/goodies.pdv> Peter Baumgartner ist Professor für Technologieunterstütztes Lernen an der Donau-Universität Krems und seit 30 Jahren in der Aus- und Weiterbildung von Lehrerinnen und Lehrern tätig Er forscht und lehrt zu Themen des didaktischen Design von Blended Learning Szenarien Lehr- und Lerntheorie Hochschuldidaktik und Evaluation interaktiver Lernsoftware und Lernumgebungen <http://www.peter.baumgartner.name>

Development Marc Lankhorst, 2012-04-23 Economies around the globe have evolved into being largely service oriented economies Consumers no longer just want a printer or a car they rather ask for a printing service or a mobility service In addition service oriented organizations increasingly exploit new devices technologies and infrastructures Agility is the ability to deal with such changing requirements and environments Agile ways of working embrace change as a positive force and harness it to the organization's competitive advantage The approach described in this book focuses on the notion of a service as a piece of functionality that offers value to its customers Instead of solely looking at agility in the context of system or software development agility is approached in a broader context The authors illustrate three kinds of agility that can be found in an agile enterprise business process and system agility These three types of agility reinforce each other and establish the foundation for the agile enterprise Architecture patterns models and all of the best practices in system development contribute to agile service development and building agile applications This book addresses two audiences On the one hand it aims at agile and architecture practitioners who are looking for more agile ways of working in designing and building business services or who are interested in extending and improving their agile methods by using models and model based architectures On the other hand it addresses students of enterprise architecture and software development or service science courses both in computer science and in business administration
