Persuasive Games Ian Bogost, 2010-08-13 An exploration of the way videogames mount arguments and make expressive statements about the world that analyzes their unique persuasive power in terms of their computational properties Videogames are an expressive medium and a persuasive medium they represent how real and imagined systems work and they invite players to interact with those systems and form judgments about them In this innovative analysis Ian Bogost examines the way videogames mount arguments and influence players Drawing on the 2 500 year history of rhetoric the study of persuasive expression Bogost analyzes rhetoric's unique function in software in general and videogames in particular The field of media studies already analyzes visual rhetoric the art of using imagery and visual representation persuasively Bogost argues that videogames thanks to their basic representational mode of procedurality rule based representations and interactions open a new domain for persuasion they realize a new form of rhetoric Bogost calls this new form procedural rhetoric a type of rhetoric tied to the core affordances of computers running processes and executing rule based symbolic manipulation He argues further that videogames have a unique persuasive power that goes beyond other forms of computational persuasion Not only can videogames support existing social and cultural positions but they can also disrupt and change these positions themselves leading to potentially significant long term social change Bogost looks at three areas in which videogame persuasion has already taken form and shows considerable potential politics advertising and learning

Business Relating Business Ian Wilkinson, 2010-01-01 This is a most informative comprehensive and well written book It is full of interesting detail and the analysis though involving many complex ideas is presented in a coherent and logical style that ensures the reader's interest is retained throughout It is very suited for its intended market final undergraduate and postgraduate students in a variety of disciplines including business business organisation marketing and customer relationship management First Trust Bank Economic Outlook and Business Review This book demonstrates that no organisation is an island but is part of a complex structure composed of a myriad of other organisations The author provides an analytical framework within which an organisation's marketing strategy may recognise the opportunities and challenges offered by the interrelated networks within which it operates Don Dixon formerly of Temple University and Penn State University US With few exceptions professors of marketing are balanced and diplomatic and avoid being personal or original They hide behind references to Journal of Marketing articles it makes them feel secure Not so Ian Wilkinson No doubt well read he explores the networks of B2B marketing on his own terms with originality business dancing is such a creative example Read his book and learn to business dance Evert Gummesson Stockholm University Sweden This book assesses the nature and development of collaborative advantages as a means to boost international competitiveness as well as the performance of both organisations and nations Business Relating Business

argues that business performance depends on the way a firm is connected to other firms and organisations and not just its own skill and resources The book synthesises thinking from marketing management economics and international business with evolutionary biology and complexity theory as well as integrating many years research on interfirm relations and networks It develops the management and policy implications of adopting relationship and network perspectives and sets out an agenda for future research Ian Wilkinson brings together the latest thinking and research in the area and this book will be of particular interest to academics focusing on a wide range of subjects within business and management and marketing including industrial and business to business marketing marketing channels supply chain management purchasing relationship marketing and management strategic alliances and joint ventures business strategy and competition The book will also appeal to economists as well as researchers in management and economic sociology industrial and organisation structure and strategy

The Life of the Automobile Steven Parissien, 2013-10-17 In this book Steven Parissien examines the impact development and significance of the automobile over its turbulent and colourful 130 year history He tells the story of the auto and of its creators from its earliest appearance in the 1880s as little more than a powered quadricycle via the early pioneer carmakers the advances of the interwar era the Golden Age of the 1950s and the iconic years of the 1960s to the decades of doubt and uncertainty following the oil crisis of 1973 which culminated in the global mergers of the 1990s and the bailouts of the early twenty first century This is not just a story of horsepower and performance The Life of the Automobile is a tale of people of intuitive carmakers such as Benz Agnelli Royce and Citro n of exceptionally gifted designers such as Issigonis Lefebvre Michelotti and Bangle and of visionary industrialists such as Ford Tata and Porsche Above all The Life of the Automobile demonstrates how the epic story of the car mirrors the history of the modern era from the brave hopes and soaring ambitions of the early twentieth century to the cynicism and ecological concerns of a century later
