Deep Learning in Action: Image and Video Processing for Practical Use Abdussalam Elhanashi,Sergio Saponara,2025-03-12 Artificial intelligence technology has

entered an extraordinary phase of fast development and wide application. The techniques developed in traditional AI research areas such as computer vision and object recognition have found many innovative applications in an array of real world settings. The general methodological contributions from AI such as a variety of recently developed deep learning algorithms have also been applied to a wide spectrum of fields such as surveillance applications, real time processing, IoT devices and health care systems. The state of the art and deep learning models have wider applicability and are highly efficient. **Deep Learning in Action: Image and Video Processing for Practical Use** provides a comprehensive and accessible resource for both intermediate to advanced readers seeking to harness the power of deep learning in the domains of video and image processing. The book bridges the gap between theoretical concepts and practical implementation by emphasizing lightweight approaches enabling readers to efficiently apply deep learning techniques to real world scenarios. It focuses on resource efficient methods making it particularly relevant in contexts where computational constraints are a concern. Provides step by step guidance on implementing deep learning techniques specifically for video and image processing tasks in real world scenarios. Emphasizes lightweight and efficient approaches to deep learning ensuring that readers learn techniques that are suited to resource constrained environments. Covers a wide range of real world applications such as object detection, image segmentation, video classification. Offers a comprehensive understanding of how deep learning can be leveraged across various domains. Encourages hands on experience that can be applied to the concepts to existing projects. **Artificial**

Intelligence and Machine Learning in Business Management Sandeep Kumar Panda, Vaibhav Mishra, R. Balamurali, Ahmed A. Elngar, 2021-11-04. **Artificial Intelligence and Machine Learning in Business Management**. The focus of this book is to introduce artificial intelligence (AI) and machine learning (ML) technologies into the context of business management. The book gives insights into the implementation and impact of AI and ML to business leaders, managers, technology developers and implementers. With the maturing use of AI or ML in the field of business intelligence, this book examines several projects with innovative uses of AI beyond data organization and access. It follows the Predictive Modeling Toolkit for providing new insight on how to use improved AI tools in the field of business. It explores cultural heritage values and risk assessments for mitigation and conservation and discusses on shore and off shore technological capabilities with spatial tools for addressing marketing and retail strategies and insurance and healthcare systems. Taking a multidisciplinary approach for using AI, this book provides a single comprehensive reference resource for undergraduate, graduate, business professionals and related disciplines. **Quarterly Update**, 1980. **AI For Teachers Book 4: Math and AI: A**
