**VR Developer Gems** William R. Sherman, 2019-06-07 This book takes the practicality of other Gems series such as Graphics Gems and Game Programming Gems and provides a quick reference for novice and expert programmers alike to swiftly track down a solution to a task needed for their VR project. Reading the book from cover to cover is not the expected use case but being familiar with the territory from the Introduction and then jumping to the needed explanations is how the book will mostly be used. Each chapter other than Introduction will contain between 5 to 10 tips, each of which is a self-contained explanation with implementation detail, generally demonstrated as pseudo code or in cases where it makes sense, actual code. Key Features: Sections written by veteran virtual reality researchers and developers; Usable code snippets that readers can put to immediate use in their own projects; Tips of value both to readers entering the field as well as those looking for solutions that expand their repertoire.

***Handbook of Research on the Global Impacts and Roles of Immersive Media*** Morie, Jacquelyn Ford, McCallum, Kate, 2019-12-06 The world is witnessing a media revolution similar to the birth of the film industry from the early 20th Century. New forms of media are expanding the human experience from passive viewership to active participants surrounding and enveloping us in ways film or television never could. New immersive media forms include virtual reality, VR, augmented reality, AR, mixed reality, XR, fulldome, CAVEs, holographic characters, projection mapping, and mixed experimental combinations of old and new live and generated media. With the continued expansion beyond the traditional frame, practitioners are crafting these new media to see how they can influence and shape the world. The Handbook of Research on the Global Impacts and Roles of Immersive Media is a collection of innovative research that provides insights on the latest in existing and emerging immersive technologies through descriptions of case studies, new business models, philosophical viewpoints, and scientific findings. While highlighting topics including augmented reality, interactive media, and spatial computing, this book is ideally designed for media technologists, storytellers, artists, journalists, designers, programmers, developers, manufacturers, entertainment executives, content creators, industry professionals, academicians, researchers, and media students.
