With case studies from large and small business it shows how enabling a remote workforce and sharing resources can reduce your organisation's carbon footprint. It describes the benefits of cloud computing, how to choose the right supplier and technologies for your particular business, key security issues and the perils and pitfalls to avoid. This Quick Start Guide puts business needs before technology, enabling you to make confident decisions about IT strategy, make the right choices for your business and reject solutions that fix problems you don't have.

Term Variation in Specialised Corpora Béatrice

Daille, 2017-08-07 This book addresses term variation which has been a very important topic in terminology, computational terminology and natural language processing for up to twenty years. This book presents the first complete inventory of term variants and the linguistic procedures that lead to their formation. It also takes into account issues raised by multilingual applications and presents ways to detect variants in five different languages: French, English, German, Spanish and Russian. The book provides insights into the following issues: What is a variant? What are the main linguistic mechanisms involved in the transformation of base terms into variants? How can variants be automatically detected in texts? Should variation be taken into account in natural language processing applications? This book is targeted at terminologists and linguists interested in term variation as well as researchers in natural language processing and computer science that must handle term variants in different kinds of applications.

Ex special forces Jacob King is a man who keeps to himself, having learned the hard way that letting people close to you trust them might just get you killed. A lesson he learned when members of his Special Ops team turned dirty while others, men he considered friends, died. He made them pay. He made them hurt. He put them in jail. And so he doesn't trust anyone anymore. He keeps his women hot and fast, his friends few to none, and his clients through the elite Walker Security at a professional distance but safe. It works for him. Until it doesn't. His newest job should be simple and cut and dry: Jewel Carpenter, the daughter of the CEO of Carpenter Enterprises, is receiving death threats. He's to protect her and find out who is issuing the threats. Simple. Cut and Dry. Until it's not. Until the chemistry between he and Jewel is all about love, hate and sex. But even as he fights the attraction to Jewel and discovers there is more to her than meets the eye, the real threat comes not from the threats she's receiving but the connection she has to him. Because his past has come full circle and those men he's made pay for their sins now want him to pay. And what better way than the woman in his bed.

HashiCorp Packer in Production
