Value in a Digital World Francisco J. López Lubián, José Esteves, 2017-11-06 An in depth examination of the concept of value in a digital world an analysis of a range of digital business models and a framework for assessing the value of digital businesses Assessing the value of traditional business was easy There are hard well tested metrics and tangible measurable assets you can literally kick the tyres of But how do you measure the value of something that consists of little more than bits of information brand awareness and a compelling idea In the winner takes all digital world how do you know if this idea is one that will attract billions of dedicated users or a few thousand fleeting trialists And most importantly how do you assess whether any given business model is robust enough to make billions or flawed in a way that will lose millions Lopez Lubian and Esteves look at what economic value means in a digital world and argue for a shift from traditional value metrics to digital value metrics Through high profile case studies they examine the process of valuation in the digital world examining the challenges of making objective judgments from subjective information and how to assess the value of data Next they analyse in depth a number of different digital business models from the perspective of delivering value to investors stakeholders and society at large Finally they present a framework model for assessing value in digital business

Political and Economic Implications of Blockchain Technology in Business and Healthcare Rodrigues, Dário de Oliveira, 2021-06-11 Besides love money and health are the most valuable human yearnings Therefore blockchain technology is paramount a new foundation of confidence for human valuable transactions Like information sharing was catalyzed on the pre blockchain internet transactions are now triggered on the new internet of value In this second digital inflection point economic media encompasses value beside information and individuals can privately transact digital assets for the first time in history Decentralized but structured organizations running on blockchain networks reduce transaction costs and are particularly competitive insofar as they guarantee data authenticity confidentiality and integrity providing functional autonomy with disintermediation and smart contracts

Everything changed after user data were made public on the internet and privately traded by big tech companies and nothing will be the same once that data is made private on the internet and publicly transacted by their rightful owners While the internet of information reshaped the world the internet of value will reform it and everything will depend politically on this being done freely Political and Economic Implications of Blockchain Technology in Business and Healthcare provides relevant theoretical frameworks on the civilizational impact of blockchain technology which redesigns human interactions concerning value transactions It gives ideas concepts and instruments to advance the knowledge on cryptoeconomics and decentralized governance in the new distributed trust paradigm The chapters explore the ethical repercussions and profound political economic consequences to society providing insights into business applications focusing on the healthcare sector In a blockchain era affected by the post COVID 19 new normal which mixes politics economics and health this book is essential for students and researchers in social and life sciences professionals and policymakers working in the fields of public and business administration and healthcare workers and researchers academicians and students interested in blockchain technology and its political and economic impacts in the industry and society
