Practice and Automatization in Second

Language Research Yuichi Suzuki, 2023-08-28 Practice is a recurring and popular theme in language education. However, the concepts of practice and automatization have recently received renewed theoretical and practical interest and are increasingly being explored from the skill acquisition theory and cognitive psychology perspectives. In this volume, leading scholars discuss the optimal types, amounts, and schedules of practice for specific language structures and skills, as well as for various types of learners and learning contexts to facilitate second language development. They illuminate how practice is instantiated for specific groups of teachers and learners in diverse institutionalized contexts such as foreign language curriculum development, intelligent computer-assisted language learning systems, task-based language teaching, and study abroad. Furthermore, original methodological syntheses of extant research on practice and automatization are presented along with guides for conducting empirical research on these topics. *Practice and Automatization in Second Language Research: Perspectives from Skill Acquisition Theory and Cognitive Psychology* is a valuable resource and reference for graduate students and researchers in the field of SLA and applied linguistics.

Inclusive Education: Global Issues and Controversies, 2020-06-29 This edited book considers the main issues and controversies within the current educational context of inclusive education from an international perspective. Authorities in the field such as Norwich Kauffman and Boyle, amongst many other international scholars, provide an enticing insight into many of the issues and controversies around inclusive education and whether it is achievable or not. We have reached a point in time where inclusive education has been the prevailing doctrine for universal education policies. However, there are still many challenges facing those working within the inclusive education space, with some countries actually becoming less inclusive. International and national legislation has continued to move towards inclusive education, yet there seems to be many gaps between the philosophy and the principles of inclusive education and systemic practice. The book aims to address the current debates surrounding the implementation of inclusive education and also offers insights into the inconsistencies between policies and practices in inclusive environments. Moreover, it analyzes contemporary research evidence on the effectiveness of inclusion and identifies directions for future research. Contributors are Kelly Ann Allen, Dimitris Anastasiou, Joanna Anderson, Adrian Ashman, Jeanmarie Badar, Christopher Boyle, Jonathan M. Campbell, Heather Craig, Leire Darretxe, Julian Elliott, Zuri e Gaintza, Betty A. Hallenbeck, Divya Jindal, Snape Marguerite Jones, James M. Kauffman, George Koutsouris.
