Empire of AI Karen Hao, 2025-05-20 An Instant New York Times Bestseller A bestselling page turner that has made waves not just in Silicon Valley but around the world With *Empire of AI* Hao is fundamentally shaping many people s perceptions and understanding of the company at the center of the AI revolution TIME Magazine TIME100 AI 2025 Excellent and deeply reported Tim Wu The New York Times Startling and intensely researched an essential account of how OpenAI and ChatGPT came to be and the catastrophic places

they will likely take us Vulture Hao's reporting inside OpenAI is exceptional and she's persuasive in her argument that the public should focus less on AI's putative sentience and more on its implications for labor and the environment Benjamin Wallace Wells New Yorker From a brilliant longtime AI insider with intimate access to the world of Sam Altman's OpenAI from the beginning an eye opening account of arguably the most fateful tech arms race in history reshaping the planet in real time from the cockpit of the company that is driving the frenzy When AI expert and investigative journalist Karen Hao first began covering OpenAI in 2019 she thought they were the good guys Founded as a nonprofit with safety enshrined as its core mission the organization was meant its leader Sam Altman told us to act as a check against more purely mercantile and potentially dangerous forces What could go wrong Over time Hao began to wrestle ever more deeply with that question Increasingly she realized that the core truth of this massively disruptive sector is that its vision of success requires an almost unprecedented amount of resources the compute power of high end chips and the processing capacity to create massive large language models the sheer volume of data that needs to be amassed at scale the humans cleaning up that data for sweatshop wages throughout the Global South and a truly alarming spike in the usage of energy and water underlying it all The truth is that we have entered a new and ominous age of empire only a small handful of globally scaled companies can even enter the field of play At the head of the pack with its ChatGPT breakthrough how would OpenAI resist such temptations Spoiler alert it didn't Armed with Microsoft's billions OpenAI is setting a breakneck pace chased by a small group of the most valuable companies in human history toward what end not even they can define All this time Hao has maintained her deep sourcing within the company and the industry and so she was in intimate contact with the story that shocked the entire tech industry Altman's sudden firing and triumphant return The behind the scenes story of what happened told here in full for the first time is revelatory of who the people controlling this technology really are But this isn't just the story of a single company however fascinating it is The g forces pressing down on the people of OpenAI are deforming the judgment of everyone else too as such forces do Naked power finds the ideology to cloak itself no one thinks they're the bad guy But in the meantime as Hao shows through intrepid reporting on the ground around the world the enormous wheels of extraction grind on By drawing on the viewpoints of Silicon Valley engineers Kenyan data laborers and Chilean water activists Hao presents the fullest picture of AI and its impact we've seen to date alongside a trenchant analysis of where things are headed An astonishing eyewitness view from both up in the command capsule of the new economy and down where the real suffering happens Empire of AI pierces the veil of the industry defining our era

concerning contactless technology in libraries information centers and other enterprises This book offers chapters on emerging research surveys and technology Covering topics such as digital libraries metaverse and security challenges this major reference work is an essential resource for librarians information professionals administrators students and educators of higher education researchers and academicians *Artificial Intelligence Applications in K-12* Helen Crompton, Diane Burke, 2024-11-12 Artificial Intelligence Applications in K 12 offers authentic instances of how AI systems can be integrated into K 12 education today As AI technologies rapidly evolve and become more accessible to primary middle and high schools worldwide there is a pressing need for new demonstrations that highlight the challenges opportunities and ethical considerations associated with these powerful tools This book explores the various roles of AI within pedagogy and assessment school administration student data management and beyond Its collected case studies present practical ideas for enhancing educational institutions and offer replicable approaches across a range of learning priorities from fostering motivation and engagement to improving feedback and achieving educational goals Researchers faculty members of teacher and leadership preparation programs curriculum and instruction specialists school based instructional designers technology coaches and other readers will gain fresh insights from diverse global perspectives on topics such as generative AI adaptive learning intelligent tutoring systems chatbots predictive technologies facial recognition software and more *Goliath's Curse* Luke Kemp, 2025-09-23 A NEXT BIG IDEA CLUB S MUST READ BOOK A radical retelling of human history through the cycle of societal collapse a Cassandra like warning about the path today s oligarchs have set and a sweeping and dire vision of a world on the brink Publishers Weekly starred review Deeply sobering and strangely inspiring Read it now or your descendants will find it in the ruins Johann Hari author of *Stolen Focus* Anyone who doubts the importance of this conversation hasn't been paying attention Bill McKibben author of *Here Comes the Sun* 12 000 years ago human history changed forever when the egalitarian groups of hunter gathering humans began to settle down and organize themselves into hierarchies The few dominated the many seizing control through violence What emerged were Goliath's large societies built on a collection of hierarchies that are also terrifyingly fragile collapsing time after time across the world Today we live in a single global Goliath one that is precariously interdependent under threat from nuclear war climate change and the existential risks of AI The next collapse may be our last In *Goliath's Curse* Cambridge scholar Luke Kemp conducts a historical autopsy on our species from the earliest cities to the collapse of modern states like Somalia Drawing on historical databases and the latest discoveries in archaeology and anthropology he uncovers groundbreaking revelations More democratic societies tend to be more resilient A modern collapse is likely to be global long lasting and more dire than ever before Collapse may be invisible until after it has occurred It's possible we're living through one now Collapse has often had a more positive outcome for the general population than for the 1% All Goliath's contain the seeds of their own demise As useful for finding a way forward as it is for diagnosing our precarious present *Goliath's Curse* is a stark reminder that there

are both bright and dark sides to societal collapse that it is not necessarily a reversion to chaos or a dark age and that making a more resilient world may well mean making a more just one **The New Fire** Ben Buchanan, Andrew Imbrie, 2024-03-05 AI is revolutionizing the world Here's how democracies can come out on top Artificial intelligence is revolutionizing the modern world It is ubiquitous in our homes and offices in the present and most certainly in the future Today we encounter AI as our distant ancestors once encountered fire If we manage AI well it will become a force for good lighting the way to many transformative inventions If we deploy it thoughtlessly it will advance beyond our control If we wield it for destruction it will fan the flames of a new kind of war one that holds democracy in the balance As AI policy experts Ben Buchanan and Andrew Imbrie show in *The New Fire* few choices are more urgent or more fascinating than how we harness this technology and for what purpose The new fire has three sparks data algorithms and computing power These components fuel viral disinformation campaigns new hacking tools and military weapons that once seemed like science fiction To autocrats AI offers the prospect of centralized control at home and asymmetric advantages in combat It is easy to assume that democracies bound by ethical constraints and disjointed in their approach will be unable to keep up But such a dystopia is hardly preordained Combining an incisive understanding of technology with shrewd geopolitical analysis Buchanan and Imbrie show how AI can work for democracy With the right approach technology need not favor tyranny

Art Intelligence Jan Svenungsson, 2024-06-04 Artists always react to the times in which they live They may celebrate them or criticize them often trying to change them But this is the first time in history that technology controlled by private companies is offering to replace the work of writers musicians illustrators and visual artists What impact will generative AI have on how we create art and how we understand what art is for How will it affect the role of the artist in the future and the conditions under which artists will work Jan Svenungsson tackles these questions investigating what AI might do for art and what it might change circling the core issue of what it is in human art making that cannot be replaced **Sustainable**

MoneyGPT James Rickards,2024-11-12 From the New York Times bestselling author of The New Great Depression and Currency Wars a telling prediction for how AI will endanger global economic markets and security In November 2022 OpenAI released GPT 4 in a chatbot form to the public In

just two months it claimed 100 million users the fastest app to ever reach this benchmark Since then AI has become an all consuming topic popping up on the news in ads on your messenger apps and in conversations with friends and family But as AI becomes ubiquitous and grows at an ever increasing pace what does it mean for the financial markets In MoneyGPT Wall Street veteran and former advisor to the Department of Defense James Rickards paints a comprehensive picture of the danger AI poses to the global financial order and the insidious ways in which AI will threaten national security Rickards shows how while AI is touted to increase efficiency and lower costs its global implementation in the financial world will actually cause chaos as selling begets selling and bank runs happen at lightning speed AI further benefits malicious actors Rickards argues because without human empathy or instinct to intervene threats like total nuclear war that once felt extreme are now more likely And throughout all this we must remain vigilant on the question of whose values will be promoted in the age of AI As Rickards predicts these systems will fail when we rely on them the most MoneyGPT shows that the danger is not that AI will malfunction but that it will function exactly as intended The peril is not in the algorithms but in ourselves And it s up to us to intervene with old fashioned human logic and common sense before it s too late

Four Battlegrounds Paul Scharre, 2023-02-28 An NPR 2023 Books We Love Pick One of the Next Big Idea Club s Must Read Books An invaluable primer to arguably the most important driver of change for our future P W Singer author of *Burn In* An award winning defense expert tells the story of today s great power rivalry the struggle to control artificial intelligence A new industrial revolution has begun Like mechanization or electricity before it artificial intelligence will touch every aspect of our lives and cause profound disruptions in the balance of global power especially among the AI superpowers China the United States and Europe Autonomous weapons expert Paul Scharre takes readers inside the fierce competition to develop and implement this game changing technology and dominate the future *Four Battlegrounds* argues that four key elements define this struggle data computing power talent and institutions Data is a vital resource like coal or oil but it must be collected and refined Advanced computer chips are the essence of computing power control over chip supply chains grants leverage over rivals Talent is about people which country attracts the best researchers and most advanced technology companies The fourth battlefield is maybe the most critical the ultimate global leader in AI will have institutions that effectively incorporate AI into their economy society and especially their military Scharre s account surges with futuristic technology He explores the ways AI systems are already discovering new strategies via millions of war game simulations developing combat tactics better than any human tracking billions of people using biometrics and subtly controlling information with secret algorithms He visits China s National Team of leading AI companies to show the chilling synergy between China s government private sector and surveillance state He interviews Pentagon leadership and tours U S Defense Department offices in Silicon Valley revealing deep tensions between the military and tech giants who control data chips and talent Yet he concludes that those tensions inherent to our democratic system create resilience and resistance to autocracy in the face of overwhelmingly powerful

technology Engaging and direct Four Battlegrounds offers a vivid picture of how AI is transforming warfare global security and the future of human freedom and what it will take for democracies to remain at the forefront of the world order
