Advances in Information and Communication Kohei Arai, 2024-03-16 The book is a valuable collection of papers presented in the Future of Information and Communications Conference FICC conducted by Science and Information Organization on 4-5 April 2024 in Berlin. It received a total of 401 paper submissions, out of which 139 are published after careful double-blind peer review. Renowned and budding scholars, academics, and distinguished members of the industry assembled under one roof to share their breakthrough research, providing answers to many complex problems boggling the world. The topics fanned across various fields involving Communication, Data Science, Ambient Intelligence, Networking, Computing, Security, and Privacy.

Herrschaft der Roboter Martin Ford, 2022-07-28 Die Welt steht vor enormen Umweltproblemen. Künstliche Intelligenz ist nicht mehr aufzuhalten; sie wird jede Dimension des menschlichen Lebens verändern. Zeit, also sich mit den Folgen, den Chancen und auch den Risiken dieser Technologien her zu beschäftigen. In seinem neuen Buch präsentiert Bestsellerautor Martin Ford eine beeindruckende Vision unserer Zukunft. Klimawandel, die nächste Pandemie, Energie und Wasserknappheit, Armut und mangelnder Zugang zu Bildung: bei all diesen Problemen kann der Einsatz von KI zur Lösung beitragen, in den falschen Händen aber auch tiefgreifenden Schaden anrichten. Ford trennt Hype und Sensationslust von der Realität und entwickelt einen Leitfaden, wie wir alle in der Zukunft die wir gerade gemeinsam schaffen erfolgreich sein können.

TOLC Exam Reading Comprehension Mizanur Rahman, 2024-07-28 This essential preparation guide is designed to help you excel in your TOLC exam. With numerous model tests and practical exercises, this book enhances your reading ability and boosts comprehension skills effectively. The initial chapters provide a thorough overview of answering strategies, passage types, and methods for eliminating incorrect choices, all illustrated with concise examples. These foundational techniques are crucial for mastering the TOLC exam. Each model test includes brief explanations of the correct answers and specifies the location of each answer within the passage. This feature helps you quickly identify and understand the relevant information, making your preparation more efficient. The guide covers a diverse range of passages on topics such as health, sports, science, and technology, history, and culture. Engaging with these varied subjects will expand your vocabulary across different fields and improve your overall reading proficiency. By working through this comprehensive guide, you will gain the insights and skills necessary to approach the TOLC exam with confidence and achieve success.

Rule of the Robots Martin Ford, 2021-09-30 In this sequel to his prescient New York Times bestseller *Rise of the Robots*, Martin Ford presents us with a striking vision of the very near future. He argues that AI is a uniquely powerful technology, a kind of electricity of intelligence that is altering every dimension of human life, often for the better, with advanced science being done by machines who can solve problems humans can not. AI has the potential to help us fight climate change or the next pandemic, but it also has a capacity for profound harm. Deep fakes, AI-generated audio or video of events that never happened, are poised to cause havoc throughout society. AI empowers authoritarian regimes like China with unprecedented mechanisms

for social control And AI can be deeply biased learning bigoted attitudes from the data used to train algorithms and perpetuating them Hard hitting and thought provoking covering everything from self driving cars to the history of deep learning to apps for diagnosing skin cancer Rule of the Robots challenges our fears and preconceptions about artificial intelligence Ford argues that AI is here to stay and the real question is not how to stop it but how to control its negative potential and harness its power for good as AI transforms our economy our politics and our lives

Deep Learning with TensorFlow and Keras Amita Kapoor, Antonio Gulli, Sujit Pal, Francois Chollet, 2022-10-06 Build cutting edge machine and deep learning systems for the lab production and mobile devices Key Features Understand the fundamentals of deep learning and machine learning through clear explanations and extensive code samples Implement graph neural networks transformers using Hugging Face and TensorFlow Hub and joint and contrastive learning Learn cutting edge machine and deep learning techniques Book Description Deep Learning with TensorFlow and Keras teaches you neural networks and deep learning techniques using TensorFlow TF and Keras You ll learn how to write deep learning applications in the most powerful popular and scalable machine learning stack available TensorFlow 2 x focuses on simplicity and ease of use with updates like eager execution intuitive higher level APIs based on Keras and flexible model building on any platform This book uses the latest TF 2 0 features and libraries to present an overview of supervised and unsupervised machine learning models and provides a comprehensive analysis of deep learning and reinforcement learning models using practical examples for the cloud mobile and large production environments This book also shows you how to create neural networks with TensorFlow runs through popular algorithms regression convolutional neural networks CNNs transformers generative adversarial networks GANs recurrent neural networks RNNs natural language processing NLP and graph neural networks GNNs covers working example apps and then dives into TF in production TF mobile and TensorFlow with AutoML What you will learn Learn how to use the popular GNNs with TensorFlow to carry out graph mining tasks Discover the world of transformers from pretraining to fine tuning to evaluating them Apply self supervised learning to natural language processing computer vision and audio signal processing Combine probabilistic and deep learning models using TensorFlow Probability Train your models on the cloud and put TF to work in real environments Build machine learning and deep learning systems with TensorFlow 2 x and the Keras API Who this book is for This hands on machine learning book is for Python developers and data scientists who want to build machine learning and deep learning systems with TensorFlow This book gives you the theory and practice required to use Keras TensorFlow and AutoML to build machine learning systems Some machine learning knowledge would be useful We don t assume TF knowledge

Proceedings of the 2024 International Conference on Artificial Intelligence and Communication (ICAIC 2024) Yulin Wang, 2024-09-23 This is an open access book With great pleasure and anticipation we extend our warmest welcome to the 2024 International Conference on Artificial Intelligence and Communication ICAIC 2024 As we embark on this journey of intellectual exchange and collaboration we are thrilled to bring

together leading experts researchers and practitioners from around the globe to explore the latest advancements and breakthroughs in these dynamic fields ICAIC 2024 promises to be a platform where innovative ideas converge fostering insightful discussions and shaping the future of AI and communication technologies With diverse sessions workshops and keynote speeches we aim to delve into the multifaceted aspects of AI and communication uncovering new possibilities and opportunities for growth and development Our call for papers encompasses several tracks each designed to showcase the latest research and developments in key areas of interest These tracks include AI and Communication Fundamental Intelligent Sensors and IoT Communication Speech and Image Processing 5G and Communication Technologies We invite scholars researchers and industry professionals to submit their original contributions and join us in exploring these vital domains Together let us delve into the realms of innovation and discovery driving forward the frontiers of knowledge and transforming ideas into tangible solutions

Foundation Models for Natural Language Processing

Gerhard Paaß, Sven Giesselbach, 2023-05-23 This open access book provides a comprehensive overview of the state of the art in research and applications of Foundation Models and is intended for readers familiar with basic Natural Language Processing NLP concepts Over the recent years a revolutionary new paradigm has been developed for training models for NLP These models are first pre trained on large collections of text documents to acquire general syntactic knowledge and semantic information Then they are fine tuned for specific tasks which they can often solve with superhuman accuracy When the models are large enough they can be instructed by prompts to solve new tasks without any fine tuning Moreover they can be applied to a wide range of different media and problem domains ranging from image and video processing to robot control learning Because they provide a blueprint for solving many tasks in artificial intelligence they have been called Foundation Models After a brief introduction to basic NLP models the main pre trained language models BERT GPT and sequence to sequence transformer are described as well as the concepts of self attention and context sensitive embedding Then different approaches to improving these models are discussed such as expanding the pre training criteria increasing the length of input texts or including extra knowledge An overview of the best performing models for about twenty application areas is then presented e.g. question answering translation story generation dialog systems generating images from text etc For each application area the strengths and weaknesses of current models are discussed and an outlook on further developments is given In addition links are provided to freely available program code A concluding chapter summarizes the economic opportunities mitigation of risks and potential developments of AI

Enhancing Higher Education and Research With OpenAI Models Demir, Şirvan Şen, Demir, Mahmut,2024-06-05 As classrooms move from chalkboards to digital platforms there s a critical juncture where the potential of AI intersects with the future of academia The problem is multifaceted it involves the nature of pedagogy the demand for personalized learning experiences and the ethical considerations inherent in deploying AI technologies Educators researchers and administrators face the challenge of navigating this transformation while ensuring inclusivity fairness and ethical practice Integrating AI in higher education risks becoming a chaotic endeavor without a comprehensive understanding of the opportunities challenges and ethical dimensions The lack of a strategic approach could lead to biases privacy concerns and a digital divide exacerbating educational inequalities Enhancing Higher Education and Research With OpenAI Models explores the intersection of artificial intelligence and higher education focusing on the social sciences A collaborative team of academics and AI expert s analyses aims to illuminate the transformative potential of integrating AI technologies into traditional educational settings The book unravels the rich tapestry of the history of higher education in the social sciences tracing the evolution from conventional blackboards to the modern digital landscape It meticulously examines the increasing integration of technology in classrooms It sets the stage for the impact of AI driven tools and data analytics on pedagogy personalized learning experiences and broader access to education *Decoding Generative AI* Farabi Shayor, Kelina

Lowther-Harris, Kirthana Srinivasan, Anoushka Samanta,2024-04-16 The emergence of Generative AI has marked a significant turning point heralding a new age of innovation and intellectual exploration Much like a compelling narrative this advancement in artificial intelligence has captivated the global community and ushered in an unprecedented surge of innovation For many years the subtle hum of AI has been interconnected into the fabric of our society Devices such as Echo Alexa and Google Home once considered avant garde are now seamlessly integrated into our homes and vehicles becoming essential navigators in our daily journeys However this new phase of AI evolution is distinct Capable of enhanced ability these new generative AI systems could easily discern the intuitive needs of their end users With a mere command or a simple image generative AI systems can draft comprehensive reports write legal documents or produce intricate visual masterpieces Their proficiency can also be extended to routine and mundane tasks smoothly managing administrative duties writing correspondences and providing invaluable support in professional settings Although these foundation models require a vast

amount of training data and billions of parameters to be effective the outcomes are equally remarkable Technology companies and investors recognising the potential embarked on an investment spree steering a new era for the development of specialised models such as Microsoft CoPilot Midjourney ChatGPT and so on As these technology companies continue to improve their language models each version seems to be more refined than its predecessor Foremost among these are the Large Language Models LLMs emblematic of this AI renaissance Now with voice activated capabilities generative AIs have become capable of much more in the relatively short span of their existence With the integration of voice activated features combined with their capabilities to speak like a human being their potential continues to grow exponentially They aren't labelled as chatbots anymore these AI systems signify a technological paradigm shift reshaping humanity's understanding of technology automation and creative expression However with such shift comes the imperative need for governance and control The unchecked expansion of AI poses unmitigated challenges In reality these advanced AIs have the potential to be transformative and destructive parallelly Thus it is necessary to establish guidelines and oversight to ensure the ethical deployment of such systems which this book focuses on As society stands at this transformative crossroads parallels are being drawn to the imaginative world of fiction The concept of Jarvis AI from the fictitious world appears provocatively close to becoming a reality The epoch of generative AI has truly dawned promising a future where technological prowess and human aspiration unite
