Pendulum Michael Hagner,2025-09-30 An investigation of a cosmic experiment In 1851 the physicist L on Foucault performed an unforgettable experiment By suspending a large pendulum inside the dome of Paris Pantheon Foucault provided the first simple direct empirical evidence of the Earth s rotation an undeniable demonstration of heliocentrism This experiment conducted long after the Copernican Revolution and using a laboratory apparatus rather than astronomical observation visually confirmed what had previously been accepted as theory The pendulum s motion clearly illustrated the Earth s rotation But Foucault s experiment did not end there It sparked a range of subsequent reenactments and interpretations each adding new layers to its meaning Repeated over and again its afterlives were many as were its ramifications Historian Michael Hagner revisits this epoch making experiment and its reception from the nineteenth century to the present day and follows how cosmological questions conjoined political and aesthetic judgments about the public staging and history of science The pendulum experiment Hagner argues is more than just a mere scientific demonstration It contains within it the histories of technological innovation ideological conflicts and the rise of popular culture and visual media In a series of insightful studies of literary artistic and scientific reenactments Hagner uses both words and images to narrate the rich and complex legacy of this experiment Seeing Foucault s Pendulum includes among other fascinating tales a short but stunning history of the Copernican Revolution the paradigm shifting work of the nineteenth century astronomer Camille Flammarion and the reenactments of Foucault s experiment at the Smithsonian Institution and New York s United Nations building Linking nature to culture and calling for world unity the experiment s legacy extends beyond science It has been reimagined in Umberto Eco s novel Foucault s Pendulum and in Gerhard Richter s 2018 installation enchantments of the postmodern world theater where the relationship between knowledge and sensory experience is problematized anew A complex symbol in the history of ideas challenging our assumptions inspiring artistic expression and prompting philosophical reflection on our place in the cosmos Foucault s experiment serves as a powerful reminder that both the Earth and the universe should never be reduced to a disposable mass of human hubris and of irresponsible manipulation Generative AI with LangChain Dr. Priyanka Singh,Hariom Singh,2025-04-25 DESCRIPTION AI is redefining how businesses solve problems

[The Complete Book of Spacecraft](#) Michael H. Gorn, Davide Sivoletta, 2025-08-26 Marvel at the history of space exploration through its daring vehicles exhaustively chronicled in this authoritative volume featuring more than 250 artworks In 1957 the world looked on with both uncertainty and amazement as the Soviet Union launched Sputnik 1 the first man made orbiter Sputnik 1 would spend three months circling Earth every 98 minutes and cover 71 million miles in the process The world s space programs have traveled far literally and figuratively since then and the spacecraft they have developed and deployed represent almost unthinkable advances for such a relatively short period In Spacecraft illustrator and aerospace professional Giuseppe De Chiara teams up with aerospace historian Michael Gorn to present a huge profusely illustrated aerospace history profiling and depicting spacecraft from Sputnik 1 through the International Space Station and everything in between including

concepts that have yet to actually venture outside the Earth's atmosphere. This updated and revised edition includes expertly written profiles depicting and describing the design, development and deployment of manned and unmanned spacecraft from around the world, including satellites, capsules, spaceplanes, rockets and space stations, now updated with the latest models. Vivid scale illustrations of the many international spacecraft in multiple view, sometimes cross section and in many cases shown in archival period photography to provide further historical context. Earthbound and spaceborne data and intel chronicling every technological leap, engineering challenge and monumental achievement from troubleshooting the lunar landers of the 60s to engineering solar driven sails to propel futuristic craft to Mars and beyond. A look ahead to an era of privatized space travel and even plans for lunar and Martian space stations and settlement. Dividing the book by era, De Chiara and Gorn feature spacecraft not only from the United States and Soviet Union, Russia but also from the European Space Agency and China. The mind-blowing machines examined in this volume include the rockets Energia, Falcon 9 and VEGA, the Hubble Space Telescope, the Cassini space probe and the Mars rovers Opportunity and Curiosity. For anyone who has marveled at humankind's attempts and advances in leaving Earth, *Spacecraft: The Complete Guide to the Rockets, Satellites, Capsules, Shuttles and Stations That Put Us in Space* is the definitive reference.

Playthings and Playtimes
Hannah Field, Seth Giddings, Ben Highmore, 2025-10-29. In 2024 at the Barbican Art Gallery in London, the Mexico-based Belgian artist Francis Al's exhibited films of children from across the world playing with sticks, hoops, marbles and other toys. The implication was clear: play feels and looks like a universal language but takes on specific local forms. Using this as a starting point, *Playthings and Playtimes* explores the conflict and contradictions that circulate when play is simultaneously recognized as a species attribute, part of human nature and as something crucially differentiated across time and space by design, technology, sentiment, pedagogic values and so on. The chapters in this volume demonstrate this interplay between the fixed and the mutable. Topics range from the elaborate miniature worlds made by H.G. Wells and his sons to digitized fidget spinners from avant-garde Uruguayan artist Joaquín Torres García's wooden blocks to the playground spaces of Kuwait and from the much maligned plastic toy to the new museum. Young V.A. Together they bring play and the world of feelings into sustained contact with the history of material culture and design, psychoanalysis, childhood studies and other disciplines concerned with play culture. In the process, *Playthings and Playtimes* investigates key elements of a humanities approach to the modern world through the prism of play's affective materiality.

Uncertainty and Explanation in Medicine and the Health Sciences
Olaf Dammann, 2025-03-27. This book offers a comprehensive account of how uncertainty is tackled in medicine and the health sciences. Olaf Dammann explores recent accounts of medicine as ineffective and suggests that the impression that medicine does not achieve its goal is at least in part due to the aleatoric natural uncertainty of biomedical processes and the subsequent epistemic/cognitive uncertainty of those who desire solid information about such processes. Dammann shows how concepts like inference, explanation and causometry help mitigate this disconnect. He points toward the

possibility that some of the statistically rigid and formalized approaches such as the randomized controlled trial as the gold standard for the justification of medical interventions might better be replaced by approaches that emphasize the coherence of evidence and the people's needs for helpful health interventions auxiliarianism *The MLflow Handbook* Robert Johnson, 2025-01-05

The MLflow Handbook End to End Machine Learning Lifecycle Management is a definitive guide that equips data scientists and IT professionals with the tools and knowledge needed to effectively manage machine learning workflows. As machine learning continues to evolve, the complexity of managing models, experiments, and deployments demands robust solutions. This book provides a clear, structured approach to utilizing MLflow, an open source platform designed to simplify and enhance every aspect of the machine learning lifecycle. Through detailed chapters, readers are introduced to setting up MLflow environments, tracking experiments, managing models, and deploying them in production.
