Sam Altman MANAS PAL, 2025-10-29 Sam Altman Architect of the AI Age is the definitive biography of one of the most influential figures in modern technology the man behind OpenAI and ChatGPT From his early days as a curious Midwestern child teaching himself to code to his rise as a Silicon Valley founder with Loopt and later as president of Y Combinator guiding hundreds of startups Altman's journey reflects the restless drive of innovation in its purest form But his most consequential chapter began with the founding of OpenAI a bold mission to ensure that artificial intelligence would serve humanity not threaten it This book traces the story of how OpenAI went from a non profit research lab to the creator of ChatGPT a tool that shocked the world by showing just how close we may be to artificial general intelligence Along the way it explores the controversial decision to adopt a capped profit structure the multibillion dollar partnership with Microsoft and the debates over safety ethics and regulation that Altman has been forced to navigate on the global stage Across more than 30 000 words of research and storytelling you'll discover Altman's childhood education and first ventures in tech Lessons from Loopt and his years shaping the next generation of startups at Y Combinator The founding vision values and controversies of OpenAI How GPT models evolved from obscure research projects into cultural phenomena The release of ChatGPT and the shockwaves it sent through business education and society Altman's views on AGI existential risk and the urgent need for regulation Criticisms and controversies that have tested his leadership The open ended possibilities of a future shaped by artificial intelligence from utopia to dystopia This is not only a biography of Sam Altman but a chronicle of our time the birth of an intelligence beyond human design and the extraordinary risks and opportunities it presents For anyone curious about where technology is heading and the people steering it this book offers both a portrait of a visionary and a reflection on the choices that will define the century The future of AI is being written now This is the story of the man holding the pen

The Catalysts: The Accelerating Forces Forging the New World Financial Order

Amanda Wick, 2025-05-15 Since the end of WWII the United States has dominated the global economic stage Not coincidentally the US dollar has served as the world's default currency America has routinely rattled its saber to wage and win wars cripple economies leverage its soft power and nudge its allies Enemies who have dared to bear the brunt of America's stifling economic sanctions have suffered the consequences For a bevy of reasons however America's global financial reign is rapidly coming to a close It's not a question of if but when No dynasty lasts forever and the US is proving to be no exception to this rule Blame or thank depending on your point of view a diverse set of powerful catalysts They include American political dysfunction the invention of cryptocurrencies and decentralized finance the rise of tribalism and others

Any one of these forces alone would challenge the mightiest of empires Their combination however is accelerating the birth of a new financial world order But what will this new uncertain financial system look like What are the rules Where are the minefields and opportunities Moreover how can a nation its elected officials a non governmental organization or a think tank navigate this often chaotic milieu Policymakers and advisors answers to these existential questions are wanting Amanda Wick has seen these forces play out firsthand both domestically and internationally As a Senior Investigative Counsel for the US House of Representatives and a staff member of the January 6th Committee she witnessed how a once great nation attempted to whitewash an insurrection On the global stage she has advised organizations of all sorts and spoken frequently about the rise of cryptocurrency web3 and blockchain technology Wick s debut book *The Catalysts The Accelerating Forces Forging the New World Financial Order* could not have arrived at a more opportune moment Insightful timely and essential *The Catalysts* clearly explains what s really happening why and what policy professionals can do to best position their constituents for the vastly different world ahead

AI Futures Evgeny Morozov,2025-04-29 A sober assessment of AI today and a bold vision for what it could be Generative AI tools released by a handful of rich tech companies are remaking the economy society and human life as we know it Must their vision be our common destiny Leading a forum acclaimed technology writer Evgeny

Morozov author of *To Save Everything Click Here* and host of the podcast *A Sense of Rebellion* takes a hard look at Silicon Valley's grip on our technological imagination. The prevailing wisdom says we can be complacent realists erecting a few guardrails around Big Tech or else total refuseniks rejecting this new technology altogether. That false choice runs roughshod over history, Morozov argues, and with it a more utopian vision of the role technology can play in our lives. To sketch a better AI future, Morozov takes us back to the past, showing how a radically different way of thinking about artificial intelligence once flourished before losing out to Cold War militarization, consumerism, and venture capital. That more humane vision can still be won, but it requires being clear-eyed about the obstacles. Only by building political power, Morozov concludes, can we wrench control of AI from Silicon Valley and build a technological future that serves us all.

Forum respondents include musician Brian Eno, computer scientist and AI pioneer Terry Winograd, free software activist and former digital minister of Taiwan Audrey Tang, technologist Bruce Schneier, writer and software engineer Wendy Liu, and journalist Edward Ongweso Jr. Also in this issue: Joelle M. Abi Rached on exploding pagers in Beirut and Israel's expanding war; Sophia Goodfriend on the military's embrace of the new AI; Lily Hu on the political theory of algorithms; Alexander Hartley on copyright after ChatGPT; Terry Nguyen on the work of literature in the age of large language models; and more.

[Searches](#) Vauhini Vara, 2025-04-08

From the author of *The Immortal King Rao*, finalist for the Pulitzer Prize, a personal exploration of how technology companies have both fulfilled and exploited the human desire for understanding and connection. A MOST ANTICIPATED BOOK. The New York Times, Esquire, Harper's Bazaar, Foreign Policy, Bustle, Alta M's Magazine, Cultured Denizen, Lit Hub, Book Riot, and Electric Literature. When it was released to the public in November 2022, ChatGPT awakened the world to a secretive project teaching AI-powered machines to write. Its creators had a sweeping ambition to build machines that could not only communicate but could do all kinds of other activities better than humans ever could. But was this goal actually achievable? And if reached, would it lead to our liberation or our subjugation? Vauhini Vara, an award-winning tech journalist and editor, had long been grappling with these questions. In 2021, she asked a predecessor of ChatGPT to write about her sister's death, resulting in an essay that was both more moving and more disturbing than she could have imagined. It quickly went viral. The experience, revealing both the power and the danger of corporate-owned technologies, forced Vara to interrogate how these technologies have influenced her understanding of her self and the world around her, from discovering online chat rooms as a preteen to using social media as the Wall Street Journal's first Facebook reporter to asking ChatGPT for writing advice while compelling her to add to the trove of human-created material exploited for corporations' financial gain. Interspersed throughout this investigation are her own Google searches, Amazon reviews, and the other raw material of internet life, including the viral AI experiment that started it all. *Searches* illuminates how technological capitalism is both shaping and exploiting human existence while proposing that by harnessing the collective creativity that makes humans unique, we might imagine a freer, more empowered relationship with our machines and ultimately with one another.
