Samsung Rising Geoffrey Cain, 2020-03-19 Longlisted for the 2020 Financial Times McKinsey Business Book of the Year Shines an incisive and entertaining light into the secretive world of the South Korean technology giant shaping our digital lives in ways we probably can t imagine Brad Stone Can the Asian giant beat Apple Based on years of reporting on Samsung for the Economist the Wall Street Journal and Time from his base

in South Korea and his countless sources inside and outside the company Geoffrey Cain offers the first deep look behind the curtains of the biggest company nobody knows How has this happened Forty years ago Samsung was a rickety Korean agricultural conglomerate that produced sugar paper and fertilizer But with the rise of the PC revolution Chairman Lee Byung chul came up with an incredibly risky multimillion dollar plan to make Samsung a major supplier of computer chips Lee had been wowed by a young Steve Jobs who sat down with the chairman to offer his advice and Lee quickly became obsessed with creating a tech empire Today Samsung employs over 350 000 people over four times as many as Apple and their revenues have grown 40 times their 1987 level Samsung alone now make up more than 20% of South Korea s exports and sells more smartphones than any other company in the world And furthermore they don t just make their own phones but are one of Apple s chief supplier on technology critical to the iPhone Yet their disastrous recall of the Galaxy Note 7 with numerous reports of phones spontaneously bursting into flames reveals the dangers of the company s headlong attempt to overtake Apple at any cost A sweeping insider account of the Korean s company s ongoing war against the likes of Google and Apple Samsung Rising shows how a determined and fearless Asian competitor is poised to take on the giants of the tech world *PC Mag* ,2000-06-27 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology Infrastructure and Technology Management Tugrul U. to become the world's favorite mobile phone brand. In the 1990s, Nokia outtrived the traditional telecommunications companies Motorola and Ericsson by introducing innovative products that allowed personalization and gaming and by exploiting new technologies which created businesses that didn't exist before such as ringtones. Once the dot-com bubble had burst and 3G licence bidding had driven the industry into a downturn, Nokia faced new competition. Microsoft challenged Nokia in software and Samsung and LG in hardware. Yet Nokia was thriving as the competition heated up. It wasn't enough because the biggest disruption in mobile communications was yet to come: the Internet. After Apple introduced the iPhone, Google gave away an open source operating system for smartphones and Skype generated revenues from a free telephone service, it wasn't enough for Nokia just to crank out products for the vast Indian market or tailor phones for AT&T or Vodafone. The industry had changed irrevocably. Whereas people in established markets wanted to access their favorite social networking services like Facebook or Twitter using a mobile device, people in emerging markets needed their first e-mail accounts. That's where Nokia's strategic Internet service Ovi came in. Behind the Screen unfolds the stories of businesses and technologies that Nokia created and turned into global successes or into miserable failures. It might be impossible to replicate Nokia's success, but the stories offer valuable nuggets on how to thrive in global markets. Strategic Management
