Advanced Topics in Artificial Intelligence Norman Foo, 2007-12-07 The 12th Australian Joint Conference on Artificial Intelligence AI QQ held in Sydney Australia 6-10 December 1999 is the latest in a series of annual regional meetings at which advances in artificial intelligence are reported This series now attracts many international papers and indeed the constitution of the program committee reflects this geographical diversity Besides the usual tutorials and workshops this year the conference included a companion symposium at which

papers on industrial applications were presented. The symposium papers have been published in a separate volume edited by Eric Tsui. Ar99 is organized by the University of New South Wales and sponsored by the Australian Computer Society, the Commonwealth Scientific and Industrial Research Organisation (CSIRO), Computer Sciences Corporation, the KRRU group at Griffith University, the Australian Artificial Intelligence Institute and Neuron Works Ltd. Ar99 received over 120 conference paper submissions of which about a third were from outside Australia. From these 39 were accepted for regular presentation and a further 15 for poster display. These proceedings contain the full regular papers and extended summaries of the poster papers. All papers were refereed mostly by two or three reviewers selected by members of the program committee and a list of these reviewers appears later. The technical program comprised two days of workshops and tutorials followed by three days of conference and symposium plenary and paper sessions.

Media Management and Artificial Intelligence Alex Connock, 2022-11-18. This cutting edge textbook examines contemporary media business models in the context of Artificial Intelligence. AI has dramatically impacted media production and distribution from recommendation engines to synthetic humans from video to text tools to natural language models. AI is really the change agent of the media industry. Answered a natural language generation model when AI was asked about the subject of this book. It will open incredible opportunities. This book seeks to explore them. The media is examined through four sections: Principles, maps business models and the key tools of AI; Platforms, covers distribution channels in Games, Streamers, Social Networks, Broadcast and Digital Publishing; Producers, covers the engines of content making including Scripted Entertainment, Factual Content, Marketing, Creators and Music; Finally, Pioneers, covers emerging sectors of Podcasting, Esports, the Metaverse and other AI driven developments. Then in each chapter a standard value creation model is applied, mapping a single sector through development, production, distribution and monetisation. Diverse case studies are analysed from India, Nigeria, South Korea, South Africa, France, the Netherlands, the US, the UK, Denmark and China around creative entrepreneurship, revenue models, profit drivers, rights and emerging AI tools. Questions are provided for each case whilst chapter summaries cement learning. Applied and technology focused, this text offers core reading for advanced undergraduate and postgraduates studying Media Management or the relationship between Entertainment Media and Technology. Online resources include chapter by chapter PowerPoint slides and an Instructor's Manual with further exercises and case studies.
