Come From Away Robert Huish, 2024-11-14 This volume takes a deep dive into the lasting legacy of stigma from the COVID 19 Pandemic Self isolation quarantine face masks hand washing and travel restrictions are all ancient methods of pandemic management that extend past antiquity Yet in a highly globalized pandemic such ancient methods were the front lines of defense for a modern day pandemic And with such ancient methods come ancient problems such as stigma Based on two years of extensive research in Nova Scotia Canada New Zealand and Australia jurisdictions that attempted to achieve Zero COVID the book carefully outlines how with each wave of the pandemic a new group was blamed for it When public measures were enforced often anger was turned to groups who were assumed to have brought the virus into the country or province The nature of anger and the nature of stigma evolved through the pandemic but the impacts remain In particular the pandemic allowed jurisdictions to designate rights and freedoms for people from certain places while heavily penalizing others from away The book argues that COVID 19 was born through globalization but the global response to it was fractured and divisive based on national and territorial identities as is reflected through targeted stigma If another pandemic is to emerge the book argues that a commitment to non stigmatizing methods is needed in order to ensure compassion dignity and respect which are the ultimate goals of global health

The Limits of the Digital Revolution Derek Hrynyshyn, 2017-03-20 This academic analysis explores social media specifically examining its influence on the cultural political and economic organization of our society and the role capitalism plays within its domain In this examination of society and technology author and educator Derek Hrynyshyn explores the ways in which social media shapes popular culture and how social power is expressed within it He debunks the misperception of the medium as a social equalizer a theory drawn from the fact that content is created by its users and compares it to mass media identifying the capitalist driven mechanisms that drive both social media and mass media The work captures his assessment that social media legitimizes the inequities among the social classes rather than challenging them The book scrutinizes the difference between social media and mass media the relationship between technologies and social change and the role of popular culture in the structure of political and economic power A careful look at social media networks such as Facebook Twitter and Google suggests that these tools are systems of surveillance monitoring everyday activities for the benefit of advertisers and the networks themselves Topics covered within the book s 10 detailed chapters include privacy online freedom of expression piracy the digital divide fragmentation and social cohesion
