G. Sumithra, Arulmurugan Ramu, Chow Chee Onn, 2020-12-30 Advances in Computing Communication Automation and Biomedical Technology aims to bring together leading academic scientists researchers industry representatives postdoctoral fellows and

research scholars around the world to share their knowledge and research expertise to advances in the areas of Computing Communication Electrical Civil Mechanical and Biomedical Systems as well as to create a prospective collaboration and networking on various areas It also provides a premier interdisciplinary platform for researchers practitioners and educators to present and discuss the most recent innovations trends and concerns as well as practical challenges encountered and solutions adopted in the fields of innovation Wireless Sensor Networks and the Internet of Things Bhagirathi

Nayak,Subhendu Kumar Pani,Tanupriya Choudhury,Suneeta Satpathy,Sachi Nandan Mohanty,2021-09-30 Wireless Sensor Networks and the Internet of Things Future Directions and Applications explores a wide range of important and real time issues and applications in this ever advancing field Different types of WSN and IoT technologies are discussed in order to provide a strong framework of reference and the volume places an emphasis on solutions to the challenges of protection conservation evaluation and implementation of WSN and IoT that lead to low cost products energy savings low carbon usage higher quality and global competitiveness The volume is divided into four sections that cover Wireless sensor networks and their relevant applications Smart monitoring and control systems with the Internet of Things Attacks threats vulnerabilities and defensive measures for smart systems Research challenges and opportunities This collection of chapters on an important and diverse range of issues presents case studies and applications of cutting edge technologies of WSN and IoT that will be valuable for academic communities in computer science information technology and electronics including cyber security monitoring and data collection The informative material presented here can be applied to many sectors including agriculture energy and power resource management biomedical and health care business management and others *Proceeding of the International Conference on Computer Networks, Big Data and IoT (ICCBI - 2018)* A. Senjyu,Syed Mohammed Shamsul Islam,Haoxiang Wang,2019-07-31 This book presents the proceedings of the International Conference on Computer Networks Big Data and IoT ICCBI 2018 held on December 19 20 2018 in Madurai India In recent years advances in information and communication technologies ICT have collectively aimed to streamline the evolution of internet applications In this context increasing the ubiquity of emerging internet applications with an enhanced capability to communicate in a distributed environment has become a major need for existing networking models and applications To achieve this Internet of Things IoT models have been developed to facilitate a smart interconnection and information exchange among modern objects which plays an essential role in every aspect of our lives Due to their pervasive nature computer networks and IoT can easily connect and engage effectively with their network users This vast network continuously generates data from heterogeneous devices creating a need to utilize big data which provides new and unprecedented opportunities to process these huge volumes of data This International Conference on Computer Networks Big Data and Internet of Things ICCBI brings together state of the art research work which briefly describes advanced IoT applications in the era of big data As such it offers valuable insights for researchers and scientists involved in developing

next generation big data driven IoT applications to address the real world challenges in building a smartly connected environment

Advances in Intelligent Information Hiding and Multimedia Signal Processing Jeng-Shyang Pan, Jianpo Li, Oyun-Erdene Namsrai, Zhenyu Meng, Miloš Savić, 2021-04-17 This book presents selected papers from the Sixteenth International Conference on Intelligent Information Hiding and Multimedia Signal Processing in conjunction with the Thirteenth International Conference on Frontiers of Information Technology Applications and Tools held on November 5-7 2020 in Ho Chi Minh City Vietnam It is divided into two volumes and discusses the latest research outcomes in the field of Information Technology IT including information hiding multimedia signal processing big data data mining bioinformatics database industrial and Internet of things and their applications

Advances in Artificial Systems for Logistics Engineering Zhengbing Hu, Qingying Zhang, Sergey Petoukhov, Matthew He, 2022-04-28 The book comprises high quality refereed research papers presented at the Second International Conference on Artificial Intelligence and Logistics Engineering ICAILE2022 held in Kyiv Ukraine on February 20-22 2022 organized jointly by the National Technical University of Ukraine Igor Sikorsky Kyiv Polytechnic Institute Wuhan University of Technology Nanning University National Aviation University and the International Research Association of Modern Education and Computer Science The topics discussed in the book include state of the art papers in artificial intelligence and logistics engineering It is an excellent source of references for researchers graduate students engineers management practitioners and undergraduate students interested in artificial intelligence and its applications in logistics engineering

International Conference on Computer Networks and Communication Technologies S. Smys, Robert Bestak, Joy Jong-Zong Chen, Ivan Kotuliak, 2018-09-17 The book features research papers presented at the International Conference on Computer Networks and Inventive Communication Technologies ICCNCT 2018 offering significant contributions from researchers and practitioners in academia and industry The topics covered include computer networks network protocols and wireless networks data communication technologies and network security Covering the main core and specialized issues in the areas of next generation wireless network design control and management as well as in the areas of protection assurance and trust in information security practices these proceedings are a valuable resource for researchers instructors students scientists engineers managers and industry practitioners

Computing and Network Sustainability H.R. Vishwakarma, Shyam Akashe, 2017-07-05 The book is compilation of technical papers presented at International Research Symposium on Computing and Network Sustainability IRSCNS 2016 held in Goa India on 1st and 2nd July 2016 The areas covered in the book are sustainable computing and security sustainable systems and technologies sustainable methodologies and applications sustainable networks applications and solutions user centered services and systems and mobile data management The novel and recent technologies presented in the book are going to be helpful for researchers and industries in their advanced works

Intelligent Embedded Systems Daniel Thalmann, N Subhashini, K. Mohanaprasad, M S Bala Murugan, 2018-02-16 This book is a collection of papers from

international experts presented at the International Conference on NextGen Electronic Technologies ICNETS2 ICNETS2 encompassed six symposia covering all aspects of electronics and communications engineering including relevant nano micro materials and devices Highlighting recent research in intelligent embedded systems the book is a valuable resource for professionals and students working in the core areas of electronics and their applications especially in signal processing embedded systems and networking The contents of this volume will be of interest to researchers and professionals alike

Applications of Deep Learning in Genomics Bipin Kumar Rai,Rupa Rani,Gautam Kumar,2025-11-12 The objective of the book is to use advanced deep learning techniques to unlock the complexities of genomic data It reveals hidden and unknown patterns to improve our understanding the role of genetics in diseases speeding up drug discovery processes illuminating evolutionary trajectories and dealing with the challenges posed by large genomic datasets It also addresses ethical concerns provides real world applications reviews future frontiers like as quantum computing and multi omics integration and presents a thorough picture of the genetic environment Overall the book aims to enhance our ability to use genomics for more precise forecasts personalised therapies and a better understanding of the underlying genetic fabric that defines life

ITSPWC 2022 S. Kannadhasan,R. Nagarajan,George Ghinea,Alagar Karthick,Basim Alhadidi,Kanagaraj Venusamy,2022-08-04 We are delighted to introduce the proceedings of the first edition of the 2022 International Conference on Intelligent Technologies in Security and Privacy for Wireless Communication ITSPWC 2022 This conference has brought researchers developers and practitioners around the world who are leveraging and developing the Wireless Communication The theme of ITSPWC 2022 was Security and Challenges for Wireless Communication and Power Energy The technical program of ITSPWC 2022 consisted of 33 full papers including 5 invited papers in oral presentation sessions at the main conference tracks The conference tracks were Track 1 Recent Trends in IoT Track 2 Recent Trends in Smart Energy Systems and Transmission Track 3 Recent Trends in Embedded Systems and Track 4 Recent Trends in Communication Systems Aside from the high quality technical paper presentations the technical program also featured one invited talk and two technical workshops The invited talk was presented by Prof Kaushik Pal from Universidade Federal do Rio de Janeiro Brazil The ITSPWC workshop aimed to gain insights into key challenges understanding and design criteria of employing wireless technologies to develop and implement future related services and applications It was a great pleasure to work with such an excellent organizing committee team for their hard work in organizing and supporting the conference In particular the Technical Program Committee led by our Co Chairs Dr R Nagarajan Dr George Ghinea Dr Alagar Karthick Dr Bassim Alhadidi and Prof Kanagaraj Venusamy who have completed the peer review process of technical papers and made a high quality technical program We are also grateful to all the authors who submitted their papers to the ITSPWC 2022 conference and workshops We strongly believe that ITSPWC conference provides a good forum for all researcher developers and practitioners to discuss all science and technology aspects that are relevant to Security and Privacy in Wireless

Communication We also expect that the future Wireless Communication conference will be as successful and stimulating as indicated by the contributions presented in this volume Dr S Kannadhasan **Blockchain-based Cyber Security** Kaushal Shah,2024-04-29 The book focuses on a paradigm of blockchain technology that addresses cyber security The challenges related to cyber security and the solutions based on Software Defined Networks are discussed The book presents solutions to deal with cyber security attacks by considering real time applications based on IoT Wireless Sensor Networks Cyber Physical Systems and Smart Grids The book is useful for academicians and research scholars worldwide working in cyber security It is also useful for industry experts working in cyber security *Papers in ITJEMAST 11(8) 2020* , International Transaction Journal of Engineering Management Applied Sciences Technologies publishes a wide spectrum of research and technical articles as well as reviews experiments experiences modelings simulations designs and innovations from engineering sciences life sciences and related disciplines as well as interdisciplinary cross disciplinary multidisciplinary subjects Original work is required Article submitted must not be under consideration of other publishers for publications *Proceedings of First International Conference on Smart System, Innovations and Computing* Arun K. Somani,Sumit Srivastava,Ankit Mundra,Sanyog Rawat,2018-01-08 The edited volume contains original papers contributed to 1st International Conference on Smart System Innovations and Computing SSIC 2017 by researchers from different countries The contributions focuses on two main areas i e Smart Systems Innovations which includes applications for smart cities smart grid social computing and privacy challenges with their theory specification design performance and system building And second Computing of Complex Solutions which includes algorithms security solutions communication and networking approaches The volume provides a snapshot of current progress in related areas and a glimpse of future possibilities This volume is useful for researchers Ph D students and professionals working in the core areas of smart systems innovations and computing *Emerging Technologies for Connected Internet of Vehicles and Intelligent Transportation System Networks* Mohamed Elhoseny,Aboul Ella Hassanien,2019-07-17 This book discusses vehicular communication systems IoT intelligent transportation systems and the Internet of Vehicles and also introduces destination marketing in a structured manner It is primarily intended for research students interested in emerging technologies for connected Internet of Vehicles and intelligent transportation system networks academics in higher education institutions including universities and vocational colleges IT professionals policy makers and legislators The book can also be used as a reference resource for both undergraduate and graduate studies Written in plain and simple language it describes new concepts so that they are accessible to readers without prior knowledge of the field **Complex, Intelligent, and Software Intensive Systems** Leonard Barolli,Nadeem Javaid,Makoto Ikeda,Makoto Takizawa,2018-06-18 This book provides a platform of scientific interaction between the three challenging and closely linked areas of ICT enabled application research and development software intensive systems complex systems and intelligent systems Software intensive systems strongly interact with other

systems sensors actuators devices other software systems and users More and more domains are using software intensive systems e g automotive and telecommunication systems embedded systems in general industrial automation systems and business applications Moreover web services offer a new platform for enabling software intensive systems Complex systems research is focused on the overall understanding of systems rather than their components Complex systems are characterized by the changing environments in which they interact They evolve and adapt through internal and external dynamic interactions The development of intelligent systems and agents which are increasingly characterized by their use of ontologies and their logical foundations offer impulses for both software intensive systems and complex systems Recent research in the field of intelligent systems robotics neuroscience artificial intelligence and cognitive sciences are vital for the future development and innovation of software intensive and complex systems

Emerging Trends in Computer Science and Its Application Anurag Tiwari,Manuj Darbari,2025-04-08 The conference brought together a diverse group of scholars researchers and industry professionals to engage in meaningful discussions and share insights on cutting edge trends in artificial intelligence machine learning data science and their multifaceted applications This collaboration and knowledge exchange fostered an environment of innovation making the conference a successful and impactful event for all participants It aimed to highlight these significant advancements and serve as a valuable resource for researchers academicians and practitioners who wish to stay informed about the recent innovations and methodologies shaping the landscape of computational intelligence By showcasing a wide range of research topics and practical implementations it not only addressed the current challenges but also inspired new ideas and approaches for future research

ICIDSSD 2020 M. Afshar Alam ,Ranjit Biswas,Jawed Ahmed, Farheen Siddiqui,2021-03-03 The International Conference on ICT for Digital Smart and Sustainable Development ICIDSSD 20 aims to provide an annual platform for the researchers academicians and professionals from across the world ICIDSSD 20 held at Jamia Hamdard New Delhi India is the second international conference of this series of conferences to be held annually The conference majorly focuses on the recent developments in the areas relating to Information and Communication Technologies and contributing to Sustainable Development ICIDSSD 20 has attracted research papers pertaining to an array of exciting research areas The selected papers cover a wide range of topics including but not limited to Sustainable Development Green Computing Smart City Artificial Intelligence Big Data Machine Learning Cloud Computing IoT ANN Cyber Security and Data Science Papers have primarily been judged on originality presentation relevance and quality of work Papers that clearly demonstrate results have been preferred We thank our esteemed authors for having shown confidence in us and entrusting us with the publication of their research papers The success of the conference would not have been possible without the submission of their quality research works We thank the members of the International Scientific Advisory Committee Technical Program Committee and members of all the other committees for their advice guidance and efforts Also we are grateful to our technical partners and sponsors viz HNF EAI
