Mastering Data Engineering and Analytics with Databricks Manoj Kumar, 2024-09-30
TAGLINE Master Databricks to Transform Data into Strategic Insights for Tomorrow's Business Challenges
KEY FEATURES Combines theory with practical steps to master Databricks Delta Lake and MLflow Real world examples from FMCG and CPG sectors demonstrate Databricks in action Covers real time data processing ML integration and CI CD for scalable pipelines Offers proven strategies to optimize workflows and avoid common pitfalls
DESCRIPTION In today's data driven world mastering data engineering is crucial for driving innovation and delivering real business impact Databricks is one of the most powerful platforms which unifies data analytics and AI requirements of numerous organizations worldwide Mastering Data Engineering and Analytics with Databricks goes beyond the basics offering a hands on practical approach tailored for professionals eager to excel in the evolving landscape of data engineering and analytics This book uniquely blends foundational knowledge with advanced applications equipping readers with the expertise to build optimize and scale data pipelines that meet real world business needs With a focus on actionable learning it delves into complex workflows including real time data processing advanced optimization with Delta Lake and seamless ML integration with MLflow skills critical for today's data professionals Drawing from real world case studies in FMCG and CPG industries this book not only teaches you how to implement Databricks solutions but also provides strategic insights into tackling industry specific challenges From setting up your environment to deploying CI CD pipelines you'll gain a competitive edge by mastering techniques that are directly applicable to your organization's data strategy By the end you'll not just understand Databricks you'll command it positioning yourself as a leader in the data engineering space
WHAT WILL YOU LEARN Design and implement scalable high performance data pipelines using Databricks for various business use cases Optimize query performance and efficiently manage cloud resources for cost effective data processing Seamlessly integrate machine learning models into your data engineering workflows for smarter automation Build and deploy real time data processing solutions for timely and actionable insights Develop reliable and fault tolerant Delta Lake architectures to support efficient data lakes at scale
WHO IS THIS BOOK FOR This book is designed for data engineering students aspiring data engineers experienced data professionals cloud data architects data scientists and analysts looking to expand their skill sets as well as IT managers seeking to master data engineering and analytics with Databricks A basic understanding of data engineering concepts familiarity with data analytics and some experience with cloud computing or programming languages such as Python or SQL will help readers fully benefit from the book's content

each chapter now comprises the newest recipes and is revised to align with Python 3.8 and higher. The book includes three new chapters that focus on using Python for test automation, machine learning projects, and for working with messy data. This edition will enable you to develop a sharp understanding of the fundamentals required to automate business processes through real-world tasks such as developing your first web scraping application, analyzing information to generate spreadsheet reports with graphs, and communicating with automatically generated emails. Once you grasp the basics, you will acquire the practical knowledge to create stunning graphs and charts using Matplotlib, generate rich graphics with relevant information, automate marketing campaigns, build machine learning projects, and execute debugging techniques. By the end of this book, you will be proficient in identifying monotonous tasks and resolving process inefficiencies to produce superior and reliable systems. What you will learn: Learn data wrangling with Python and Pandas for your data science and AI projects; Automate tasks such as text classification, email filtering, and web scraping with Python; Use Matplotlib to generate a variety of stunning graphs, charts, and maps; Automate a range of report generation tasks from sending SMS and email campaigns to creating templates, adding images in Word, and even encrypting PDFs; Master web scraping and web crawling of popular file formats and directories with tools like BeautifulSoup; Build cool projects such as a Telegram bot for your marketing campaign, a reader from a news RSS feed, and a machine learning model to classify emails to the correct department based on their content; Create fire-and-forget automation tasks by writing cron jobs, log files, and regexes with Python scripting. Who this book is for: Python Automation Cookbook, Second Edition, is for developers, data enthusiasts, or anyone who wants to automate monotonous manual tasks related to business processes such as finance, sales, and HR, among others. Working knowledge of Python is all you need to get started with this book.
