Netflix Act Practice In The Us:

Stocks for All: People's Capitalism in the Twenty-First Century Petri Mäntysaari, 2021-12-31 Public stock markets are too small This book is an effort to rescue public stock markets in the EU and the US There should be more companies with publicly traded shares and more direct share ownership Anchored in a broad historical study of the regulation of stock markets and companies in Europe and the US the book proposes ways to create a new regulatory regime designed to help firms and facilitate people's capitalism Through its comparative and historical study of regulation and legal practices the book helps to understand the evolution of public stock markets from the nineteenth century to the present day The book identifies design principles that reflect prior regulation While continental European company law has produced many enduring design principles the recent regulation of stock markets in the EU and the US has failed to serve the needs of both firms and retail investors The book therefore proposes a new set of design principles to serve contemporary societal needs

Streaming and Copyright Law Lasantha Ariyaratna, 2022-09-05 This book examines the challenges posed to Australian copyright law by streaming from the end user perspective It compares the Australian position with the European Union and United States to draw lessons from them regarding how they have dealt with streaming and copyright By critically examining the technological functionality of streaming and the failure of copyright enforcement against the masses it argues for strengthening end user rights The rising popularity of streaming has resulted in a revolutionary change to how digital content such as sound recordings cinematographic films and radio and television broadcasts is used on the internet Superseding the conventional method of downloading using streaming to access digital content has challenged copyright law because it is not clear whether end user acts of streaming constitute copyright infringement These prevailing grey areas between copyright and streaming often make end users feel doubtful about accessing digital content through streaming It is uncertain whether exercising the right of reproduction is appropriately suited for streaming given the ambiguities of embodiment and scope of substantial part Conversely the fair dealing defence in Australia cannot be used aptly to defend end users acts of streaming digital content because end users who use streaming to access digital content can rarely rely on the defence of fair dealing for the purposes of criticism or review news reporting parody or satire or research or study When considering a temporary copy exception end users are at risk of being held liable for infringement when using streaming to access a website that contains infringing digital content even if they lack any knowledge about the content's infringing nature Moreover the grey areas in circumventing geo blocking have made end users hesitant to access websites through streaming because it is not clear whether technological protection measures apply to geo blocking End users have a severe lack of knowledge about

whether they can use circumvention methods such as virtual private networks to access streaming websites without being held liable for copyright infringement Despite the intricacies between copyright and access to digital content the recently implemented website blocking laws have emboldened copyright owners while suppressing end users access to digital content This is because the principles of proportionality and public interest have been given less attention when determining website blocking injunctions

The Future of Disaster Management in the U.S. Amy LePore, 2016-12-08 U S congressional debates over the last few years have highlighted a paradox although research demonstrates that emergencies are most effectively managed at the local level fiscal support and programmatic management in response to disasters has shifted to the federal level While the growing complexity of catastrophes may overwhelm local capacities and would seem to necessitate more federal engagement can a federal approach be sustainable and can it contribute to local capacity building This timely book examines local capacity building as well as the current legal policy and fiscal framework for disaster management questioning some of the fundamentals of the current system exploring whether accountability and responsibilities are correctly placed offering alternative models and taking stock of the current practices that reflect an effective use of resources in a complex emergency management system The Future of Disaster Management in the U S will be of interest to disaster and emergency managers as well as public servants and policy makers at all levels tasked with responding to increasingly complex catastrophes of all kinds

Drug Trafficking in Mexico and the United States Gabriel Ferreyra, 2020-06-22 Gabriel Ferreyra presents a comprehensive analysis of drug trafficking in Mexico and the United States by examining the roots development consolidation and cultural ramifications of this phenomenon in the past century as well as its negative consequences in contemporary Mexico Ferreyra discusses the most devastating effects correlated to drug trafficking such as high murder rates gruesome violence disappearances and mass graves to emphasize how Mexican society bears the brunt of this phenomenon while the United States insists on the futility of drug prohibition Unlike other publications this book provides an interdisciplinary social science approach where drug trafficking is conceptualized as a multifaceted social political economic and cultural problem rather than just a criminal justice issue Drug Trafficking in Mexico and the United States also revisits the war on drugs and provides an argument how drug control is the primary force behind drug trafficking In that respect there is an analysis on how the DEA has reinforced the war on drugs model and why it became a reactionary agency that opposes any comprehensive alternative to the American drug problem besides drug control The author concludes

with recommendations to implement forward thinking measures such as decriminalization reclassification and legalization of drugs to effectively address the illicit drug trade **Federal Register** ,2013-11 **Dis.Ordering Distribution** Cornelia Storz,Vinzenz Hediger,Matthias Krings,2025-09-23 Dis Ordering Distribution explores the intricate relationship between distribution and production drawing on empirical evidence from two vibrant centers of cultural production Africa and Asia
