Vulture Hao's reporting inside OpenAI is exceptional and she's persuasive in her argument that the public should focus less on AI's putative sentience and more on its implications for labor and the environment Benjamin Wallace Wells New Yorker From a brilliant longtime AI insider with intimate access to the world of Sam Altman's OpenAI from the beginning an eye opening account of arguably the most fateful tech arms race in history reshaping the planet in real time from the cockpit of the company that is driving the frenzy When AI expert and investigative journalist Karen Hao first began covering OpenAI in 2019 she thought they were the good guys Founded as a nonprofit with safety enshrined as its core mission the organization was meant its leader Sam Altman told us to act as a check against more purely mercantile and potentially dangerous forces What could go wrong Over time Hao began to wrestle ever more deeply with that question Increasingly she realized that the core truth of this massively disruptive sector is that its vision of success requires an almost unprecedented amount of resources the compute power of high end chips and the processing capacity to create massive large language models the sheer volume of data that needs to be amassed at scale the humans cleaning up that data for sweatshop wages throughout the Global South and a truly alarming spike in the usage of energy and water underlying it all The truth is that we have entered a new and ominous age of empire only a small handful of globally scaled companies can even enter the field of play At the head of the pack with its ChatGPT breakthrough how would OpenAI resist such temptations Spoiler alert it didn't Armed with Microsoft's billions OpenAI is setting a breakneck pace chased by a small group of the most valuable companies in human history toward what end not even they can define All this time Hao has maintained her deep sourcing within the company and the industry and so she was in intimate contact with the story that shocked the entire tech industry Altman's sudden firing and triumphant return The behind the scenes story of what happened told here in full for the first time is revelatory of who the people controlling this technology really are But this isn't just the story of a single company however fascinating it is The g forces pressing down on the people of OpenAI are deforming the judgment of everyone else too as such forces do Naked power finds the ideology to cloak itself no one thinks they're the bad guy But in the meantime as Hao shows through intrepid reporting on the ground around the world the enormous wheels of extraction grind on By drawing on the viewpoints of Silicon Valley engineers Kenyan data laborers and Chilean water activists Hao presents the fullest picture of AI and its impact we've seen to date alongside a trenchant analysis of where things are headed An astonishing eyewitness view from both up in the command capsule of the new economy and down where the real suffering happens Empire of AI pierces the veil of the industry defining our era *Advanced Snowflake* Muhammad Fasih Ullah, 2025-09-25 As Snowflake's capabilities expand staying updated with its latest features and functionalities can be overwhelming The platform's rapid development gave rise to advanced tools like Snowpark and the Native App Framework which are crucial for optimizing data operations but may seem complex to navigate In this essential book author Muhammad Fasih Ullah offers a detailed guide to understanding these sophisticated tools ensuring you can

ARTIFICIAL INTELLIGENCE IN HEALTHCARE: ADVANTAGES AND DISADVANTAGES Amit Vyas, Varun Dixit, Davinderjit Kaur, Dr. Haewon Byeon, 2023-08-21 Homo sapiens have always had the goal of finding a means to upgrade and improve their living situations in a manner that is in line with how they see life This is parallel to the history of our ancestors which covers a thousand miles beginning with the caveman who struggled only to find food and finishing with the voyage that embarked upon the greatest blessing as the evolution of the human mind to critically analyze the environment and surrounding The journey began with the caveman and ended with the evolution of the human mind to critically analyze the environment and surrounding The concept of Artificial Intelligence AI has allowed mankind to leap into an environment that is entirely diversified and imaginative This is an environment in which we can separate the typical

industrial revolution from the dilemma of the information technology revolution A computerized information technology based system that is capable of doing many activities simultaneously in order to integrate a large number of algorithmic pieces of data and consult with either built in or internet data bases in order to provide you with answers to your questions When we talk about artificial intelligence we are referring to the following 3 At this point in time artificial intelligence has permeated every imaginable facet of our existence resulting in an abundance of time saving inventions and straightforward answers to issues that were previously intractable As a direct consequence of this our lives have been forced into comfort zones that are apparently more pleasurable The newly found corporate empire that is healthcare is quickly getting connected with information technology on an ever increasing scale across all of its domains This is not just true for the healthcare industry but certainly for other fields as well When it comes to addressing AI in healthcare it appears that a situation that is very similar to the one that arises when discussing any new notion or concept This is something that is always important for a productive dialogue and progress However as of right now there is a little stronger lean toward the latter group than there is towards the former group 1 P a ge Equipment that interacts with hospital information and management systems will simply take in all of the data based on the clinical presentation and will provide you with beepers flashers and changing color codes to alert you to issues about patients in real time Not only has the movement of data between and within departments become far quicker than it was in the past but the machinery that interacts with these systems also gives you access to the data in real time The next stage was to supply the treating physicians with an algorithmic method that would aid in the interpretation of the data At the same time the material was going to be provided to consultants and the necessary data repositories so that it could be better understood In a word the purpose of this cutting edge human machine interface was to facilitate the management of the most optimal medical judgments that could possibly be made Not only does the system prevent the laborious entering of data but it also has the potential to provide feedback to interventions along with a time line This is all made possible by the system s use of barcodes In the case that a mistake was made this helps to reduce the number of comments that need to be made which can be verbally conflicting and take up a lot of time **Empowering**
