Nation,

Region and History in Post-Communist Transitions Peter W Rodgers, 2012-05-25 Since independence in 1991 issues of nation and identity have become highly debated topics in Ukraine This monograph explores not only how national identity is being re constructed by the Ukrainian state but also the processes by which it is negotiated through society The central argument of this work is that too much attention concerning identity in Ukraine has focused on markers of ethnicity and language Instead the author advocates a regional approach engaging with the issue of how Ukraine s regional differences affect nation building processes Following the tumultuous events of the Orange Revolution the view of Ukraine as a country inherently divided between East and West has re emerged to become a popular explanation for political events The study outlines the necessity for academics policymakers and indeed politicians to veer away from this simplistic West versus East divide The book advocates an analysis of Ukraine s unique brand of regionalism not in terms of divisions but in terms of regional differences and diversity The author deconstructs the concept of Eastern Ukraine by focusing on three Ukrainian localities all adjacent to the Ukrainian Russian border The study examines how individuals provide their own understanding of the place of their region within the wider processes of nation building across Ukraine In doing so the book develops a regional approach to the study of identity politics in Ukraine

History and Its Objects Peter N. Miller, 2017-03-01 Weaving together literary and scholarly insights *History and Its Objects* will prove indispensable reading for historians and cultural historians as well as anthropologists and archeologists worldwide Nathan Schlanger *cole nationale des chartes Paris* Cultural history is increasingly informed by the history of material culture the ways in which individuals or entire societies create and relate to objects both mundane and extraordinary rather than on textual evidence alone Books such as *The Hare with Amber Eyes* and *A History of the World in 100 Objects* indicate the growing popularity of this way of understanding the past In *History and Its Objects* Peter N Miller uncovers the forgotten origins of our fascination with exploring the past through its artifacts by highlighting the role of antiquarianism a pursuit ignored and derided by modern academic history in grasping the significance of material culture From the efforts of Renaissance antiquarians who reconstructed life in the ancient world from coins inscriptions seals and other detritus to amateur historians in the nineteenth century working within burgeoning national traditions Miller connects collecting whether by individuals or institutions to the professionalization of the historical profession one which came to regard its progenitors with skepticism and disdain The struggle to articulate the value of objects as historical evidence then lies at the heart both of academic history writing and of the popular engagement with things Ultimately this book demonstrates that our current preoccupation with objects is far from novel and reflects a human need to reexperience the past as a physical presence
