Overcoming Difficulties With Number Supporting Dyscalculia And Students Who Struggle With Maths:

Overcoming Difficulties with Number Ronit Bird, 2009-10-02 In writing this practical book Ronit Bird has drawn on her teaching and training experience to create teaching plans for key numeracy topics aimed at those working with students aged 9-16. She provides detailed strategies for teaching numeracy skills through a progression of practical activities and visualisation techniques which build the self-esteem of students who need extra help and give them a basic foundation in number. While the plans cover the National Numeracy Strategy they can also be used in any setting where maths is being taught. Topics covered include games and puzzles for learning number components bridging multiplication, division, reasoning strategies. A bank of accompanying resources, games, activities and Su Doku puzzles is available on the CD included with this book. This is an ideal resource for both class teachers and maths subject teachers and is equally useful for teaching assistants and learning support assistants.

Overcoming Dyscalculia and Difficulties with Number Ronit Bird, 2021-09-08 This practical book draws on Ronit Bird's teaching experience to create detailed strategies and teaching plans for students aged 9-16 who have difficulties with number. Activities and games are used to teach numeracy skills in these key areas: number components, bridging multiplication, division and reasoning strategies. New to this edition: An updated Part I improving the clarity and flow of the teaching ideas including a table mapping games against specific teaching points. More activities and guidance for multiplication and division. A new Part V consolidating new and existing teaching games in one place. 4 new videos added to the online resources. This is an ideal resource for class teachers, SENCO, Special Educational Needs Coordinator and maths subject leader and is equally useful for teaching assistants and learning support assistants.

Understanding and Teaching Primary Mathematics Tony Cotton, 2016-05-26 Written by an education consultant with widespread experience of teaching mathematics in the UK and internationally, *Understanding and Teaching Primary Mathematics* seamlessly combines pedagogy and subject knowledge to build confidence and equip you with all the skills and know-how you need to successfully teach mathematics to children of any age. This 3rd edition has been fully updated to reflect the latest research, developments and initiatives in the field as well as key changes to both the UK National Curriculum and International Baccalaureate including a brand new chapter on Algebra and a reworked focus on the early years. Extra features also include helpful call-outs to the book's revised and updated companion website which offers a shared site with a range of resources relevant to both this book and its new companion volume *Teaching for Mathematical Understanding*. Stimulating, accessible and well illustrated with comprehensive coverage of subject knowledge and pedagogy, *Understanding and Teaching Primary Mathematics* is an essential purchase for trainee and practising teachers alike. Companion website features new to this edition include video clips in which the author demonstrates the concepts covered in the book through teaching to a real class, PowerPoint presentations which provide support for those using the book as a part of a teacher training course, updated weblinks to external sites with useful teaching information and resources.

Understanding Learning Difficulties in Maths: Dyscalculia, Dyslexia or Dyspraxia? Judy Hornigold, 2017-10-16 Why do some pupils experience maths learning difficulties How can you determine whether there is a specific learning difficulty such as dyscalculia dyspraxia or dyslexia What teaching strategies can help overcome maths anxiety and specific maths learning difficulties Without doubt maths is one of the most important subjects taught in schools and yet it is the one subject that can strike fear and dread in children from the very start of their education In this book Judy Hornigold explores potential causes of maths learning difficulties and particularly the specific difficulties that learners with dyscalculia dyslexia and or dyspraxia experience It considers how general maths anxiety impedes mathematical development and then examines whether this or a more fundamental and specific difficulty with maths such as dyscalculia is the real root of difficulties The book then looks in detail at a wide range of strategies to help overcome general maths anxiety and more specific learning difficulties It addresses four distinct areas core number reasoning memory

and visual spatial awareness as the main areas of difficulty for learners with dyscalculia core number and reasoning dyslexia memory and dyspraxia visual spatial awareness *The Times Index* ,2008 Indexes the Times and its supplements

Mathematics for Dyslexics Steve Chinn,Richard Edmund Ashcroft,2006-11-02 Mathematics for Dyslexics Including Dyscalculia 3rd Edition discusses the factors that contribute to the potential difficulties many dyslexic learners may have with mathematics and suggests ways of addressing these difficulties The first chapters consider the theoretical background The later chapters look at practical methods which may help dyslexic learners The book is designed to be comprehensive and to help teachers support assistants and parents understand the learner and to learn a range of skills and thus develop confidence and competence in working with dyslexic pupils Current Index to Journals in Education ,2002 *Working with Dyscalculia* Anne Henderson,Came Felipe,Fil Came,Mel Brough,2003 **Dyscalculia Pocketbook** Judy Hornigold,2015-11-10 Are you an inchworm or a grasshopper These are the descriptive terms applied by Professor Steve Chinn and colleagues to two distinct maths learning styles While grasshoppers get the bigger picture and have a real facility with number inchworms understand a great deal less They follow mathematical procedures mechanically without understanding number and without the capacity to be flexible creative or to check their work Not all inchworms are dyscalculic but all dyscalculics are inchworms In the Dyscalculia Pocketbook you will find out exactly what dyscalculia is and why it s not the same as maths anxiety discover the possible causes of dyscalculia its different subtypes and the learning difficulties it gives rise to learn about different ways to identify dyscalculia and importantly find support strategies for supporting children who have this specific learning difficulty Author Judy Hornigold nicely balances research theory and practice She reminds us about the three components of a mathematical idea and the six levels of knowledge but the Pocketbook is full of classroom examples and applications recommended resources and how to use them teaching ideas tips and games that will support and develop the maths ability of dyscalculic learners **The British National Bibliography** Arthur James Wells,2004 *The Fear of Maths* Steve Chinn,2011-09-01 Maths is an essential skill but many people fear that they will never pick up the maths that they failed to understand in school Don t worry Most people know more maths than they realise Steve Chinn is your guide to understanding the basic facts of maths as you will use it in daily life There are many reasons why the inability to do maths affects so many children and follows them into adulthood and it has little to do with intelligence The major reason is anxiety the best way to overcome that anxiety is to build on existing knowledge Everyone has some maths skills and knowledge that can be extended to many more skills and knowledge The Fear of Maths How to Overcome It is for parents and teachers looking for a way to encourage and help their children It is based on teaching maths as a set of principles rather than a series of facts to be memorised to be understood and how they can be used in various situations to make numbers seem less threatening and perhaps for the first time to begin to make sense Numbers are integral to everyday life from checking the cost of shopping and understanding a train timetable to calculating the best value
