Oversight Representing The Interests Of Blacks And Latinos In Congress:

Oversight Michael D. Minta, 2011-08-08 Oversight answers the question of whether black and Latino legislators better represent minority interests in Congress than white legislators and it is the first book on the subject to focus on congressional oversight rather than roll call voting In this important book Michael Minta demonstrates that minority lawmakers provide qualitatively better representation of black and Latino interests than their white counterparts They are more likely to intervene in decision making by federal agencies by testifying in support of minority interests at congressional oversight hearings Minority legislators write more letters urging agency officials to enforce civil rights policies and spend significant time and effort advocating for solutions to problems that affect all racial and ethnic groups such as poverty inadequate health care fair housing and community development In Oversight Minta argues that minority members of Congress act on behalf of broad minority interests inside and outside their districts because of a shared bond of experience and a sense of linked fate He shows how the presence of black and Latino legislators in the committee room increases the chances that minority perspectives and concerns will be addressed in committee deliberations and also how minority lawmakers are effective at countering negative stereotypes about minorities in policy debates on issues like affirmative action and affordable housing

Congress in Black and White Christian R. Grose, 2011-01-31 The symbolic importance of Barack Obama's election is without question But beyond symbolism does the election of African American politicians matter Grose argues that it does and presents a unified theory of representation Electing African American legislators yields more federal dollars and congressional attention directed toward African American voters However race and affirmative action gerrymandering have no impact on public policy passed in Congress Grose is the first to examine a natural experiment and exceptional moment in history in which black legislators especially in the U S South represented districts with a majority of white constituents This is the first systematic examination of the effect of a legislator's race above and beyond the effect of constituency racial characteristics Grose offers policy prescriptions including the suggestion that voting rights advocates the courts and redistricters draw black decisive districts electorally competitive districts that are likely to elect African Americans

Latino Politics en Ciencia Política Tony Affigne, Evelyn Hu-DeHart, Marion Orr, 2014 More than 53 million Latinos now constitute the largest fastest growing and most diverse minority group in the United States and the nation's political future may well be shaped by Latinos continuing political incorporation In the 2012 election Latinos proved to be a critical voting bloc in both Presidential and Congressional races this demographic will only become more important in future American elections Using new evidence from the largest ever scientific survey addressed exclusively to Latino Hispanic respondents *Latino Politics en Ciencia Política* explores political diversity within the Latino community considering how intra community differences influence political behavior and policy preferences The editors and contributors all noted scholars of race and politics examine key issues of Latino politics in the contemporary United States Latino identities latinidad

transnationalism acculturation political community and racial consciousness The book contextualizes today's research within the history of Latino political studies from the field's beginnings to the present explaining how systematic analysis of Latino political behavior has over time become integral to the study of political science *Latino Politics en Ciencia Politica* is thus an ideal text for learning both the state of the field today and key dimensions of Latino political attitudes *Representing the Advantaged* Daniel M. Butler, 2014-07-14 This book argues that a significant amount of bias in representation traces its roots to the information opinions and attitudes that politicians bring to office It suggests that even if all voters participated equally there would still be significant levels of bias in American politics because of differences in elite participation *Black-Latino Relations in U.S. National Politics* Rodney E. Hero, Robert R. Preuhs, 2013-01-21 Social science research has frequently found conflict between Latinos and African Americans in urban politics and governance as well as in the groups attitudes toward one another Rodney E Hero and Robert R Preuhs analyze whether conflict between these two groups is also found in national politics Based on extensive evidence on the activities of minority advocacy group in national politics and the behavior of minority members of Congress the authors find the relationship between the groups is characterized mainly by non conflict and a considerable degree of independence The question of why there appears to be little minority intergroup conflict at the national level of government is also addressed This is the first systematic study of Black Latino intergroup relations at the national level of United States politics Gender, Race, and Office Holding in the United States Becki Scola, 2013-12-04 Over the past several decades the number of women elected to higher office in the United States has grown substantially However when the electoral gains of women are considered on a state by state basis there are observable variations in the rate by state at which women are elected to state legislative office Scholars have noted an additional variation in women office holders that women of color serve at higher rates than white women Becki Scola's book provides an explanation for these two interrelated puzzles on electoral gender gaps She examines the factors surrounding the uneven proportional distribution of female legislators and then explores why gender appears to be an advantage for women of color office holders Through an examination of the divergent state level institutional and environmental conditions Scola maps out the factors that contribute to more or less female legislative service and how race ethnicity intersects with these conditions She reveals that the common conceptions and theories that help us understand women's office holding in general do not equally apply to both white women and women of color's legislative service The first book length study to analyze how race informs gender in terms of patterns of office holding *Gender Race and Office Holding in the United States* provides insight into both underrepresentation in general as well as the underlying dynamics of representation within specific groups of women Grassroots and Coalitions Michael Mitchell, 2017-07-12 The main focus of this volume is an exploration of the patterns of competition for political power at the state and local levels in American politics This volume looks at institutionalized patterns of black political power as they have evolved in the aftermath of the civil rights movement in the 1960s The editors

argue that enough time has elapsed to warrant a new look at the circumstances in which black politics in America has played out Chapters include an examination of the ability of black candidates to win statewide elections with crucial white support an analysis of the impact of local political organizations in enhancing the chances of black candidates in winning local races a look at the messages of black pastors regarding solidarity with the Latino community and an investigation of the extent of the differences in the political participatory styles of poor blacks and poor whites The editors note that changes have taken place as black American politics has confronted new complexities A works in progress section explains how theories of racial violence can be used to analyze racial incidents in the United States Other essays include reflections on blacks in Brazil and in urban American politics

Congress Reconsidered Lawrence C. Dodd, Bruce I. Oppenheimer, Ruth Bloch Rubin, C. Lawrence Evans, 2024-12-31 Since its first edition *Congress Reconsidered* was designed to make available the best contemporary work from leading congressional scholars in a form that is both challenging and accessible to undergraduates With their Thirteenth Edition Lawrence C Dodd Bruce I Oppenheimer and C Lawrence Evans and now Ruth Bloch Rubin from the University of Chicago continue this tradition as their contributors focus on how various aspects of Congress have changed over time With a strong focus to the historical development of political institutions in their role in preserving democratic government this bestselling volume remains on the cutting edge with key insights into the workings of Congress

The Oxford Handbook of Political Representation in Liberal Democracies Robert Rohrschneider, J. J. A. Thomassen, 2020 How can democracies effectively represent citizens The goal of this Handbook is to evaluate comprehensively how well the interests and preferences of mass publics become represented by institutions in liberal democracies It first explores how the idea and institutions of liberal democracies were formed over centuries and became enshrined in Western political systems The contributors to this Handbook made up of the world s leading scholars on the

various aspects of political representation examine how well the political elites and parties who are charged with the representation of the public interest meet their duties. Clearly institutions often fail to live up to their own representation goals. With this in mind the contributors explore several challenges to the way that the system of representation is organized in modern democracies. For example actors such as parties and established elites face rising distrust among electorates. Also the rise of international problems such as migration and environmentalism suggests that the focus of democracies on nation states may have to shift to a more international level. All told this Handbook illuminates the normative and functional challenges faced by representative institutions in liberal democracies.

The Politics of African-American Education

Kenneth J. Meier, Amanda Rutherford, 2016-08-22. Based on the 1,800 largest school districts in the United States over a decade, *The Politics of African American Education* documents the status of African American education and the major role that partisanship plays. The book brings together the most comprehensive database on minority education to date that centers around three arguments. First, partisanship permeates African American education; it affects who is elected to the school board, the racial composition of school administrators and teachers, and the access of African American students to quality education. Second, African American representation matters. The effectiveness of African American representation, however, is enhanced in Democratic districts while representation in Republican districts has little influence. Third, political structures matter, but they are not determinative. Two different structures, election rules, and the independent school district create the rules of the game in US education politics and policy but do not limit others from using those rules to change the outcome.

The Radical Imagination of Black Women Pearl K. Ford Dowe, Pearl K. Ford, 2023. Historically many Black women have viewed political participation as a means to achieve full equality and improve their status in US society. To this end Black women have long engaged in politics through activism, voting mobilization, and seeking office. Since 2016 the number of women, particularly Black women seeking office, has increased dramatically. Including interviews with Black women holding political office at the national, state, and local levels, as well as focus group data, *The Radical Imagination of Black Women* challenges political science's current approach to political ambition by exploring how Black women decide to seek political office. Pearl K. Ford Dowe argues that ambition for Black women cannot be measured only by political candidacies and ascents of the political chain of power. Black women are uniquely positioned within their communities to influence politics and public policy, which stems from unique variables of socialization, gender, and racial identity and marginalization that shape the political attitudes of Black women. Thus Dowe asserts that Black women's political ambition often manifests outside formal politics in activism and community building, a process that is linked to a wider radical vision for a full democracy. This is ambition that occurs in a specific context of marginalization, and both motivation and the conditions surrounding such motivation are critical to understanding the full range of Black women's political work. By focusing on Black women's experiences in elite politics, *The Radical Imagination of Black Women* is a much needed

intervention in the literature on electoral ambition women in politics and candidates and elections Asymmetric Politics Matthew Grossmann, David A. Hopkins, 2016 The Republican Party is the vehicle of an ideological movement whereas the Democratic Party is a coalition of social groups with concrete policy concerns Democrats prefer a more moderate party leadership that makes compromises whereas Republicans favor a more conservative party leadership that sticks to principles Each party finds popular support for its approach because the American public simultaneously favors liberal positions on specific policy issues and conservative views on the broader role of government **No Longer Outsiders** Michael D. Minta, 2021-07-12 How effective are civil rights organizations in lobbying Congress They lack the resources of wealthier business funded lobbying groups And yet these groups have been able to influence Congress in order to pass legislation and pressure agencies in the service of minority communities In *No Longer Outsiders* Black and Latino Interest Group Advocacy on Capitol Hill Michael D Minta explores the ways that civil rights groups representing a range of racial and ethnic minorities achieve success in Congress Minta shows how increasing diversity in the House of Representatives plays an important role in the success of civil rights organizations These organizations gain power and respect in part because they indeed represent the interests and views of their minority groups The organizations from different ethnic and racial groups successfully cooperate on legislation and work closely with groups like the Congressional Black and Latino Caucuses to get a place at the legislative table *Governing with Words* Daniel Q. Gillion, 2016-04-04 Rather than considering political discussions and rhetoric as symbolic inconsequential forms of politics *Governing with Words* conceptualizes them as forms of government action that can shape institutions and societal norms Daniel Q Gillion refers to this theory as discursive governance Federal politicians statements about racial and ethnic minority concerns aid the passage of minority public policies and improve individual lifestyle behaviors Unfortunately most of the American public continues to disapprove of politicians rhetoric that highlights race The book argues that addressing racial and ethnic inequality continues to be a tug of war between avoiding the backlash of the majority in this nation while advocating for minority interests Even though this paradox looms over politicians discussions of race race conscious political speech viewed in its entirety is the mechanism by which marginalized groups find a place in the democratic process Such race conscious discussions the book argues have ramifications both within and outside of government Campaigning in a Racially Diversifying America Loren Collingwood, 2020-01-08 As the voting public continues to diversify across the United States political candidates and particularly white candidates increasingly recognize the importance of making appeals to voters who do not look like themselves As history has shown this has been accomplished with varying degrees of success In this book Loren Collingwood develops a theory of Cross Racial Electoral Mobilization CRM to explain why when and how candidates of one race or ethnicity act to mobilize voters of another race or ethnicity The book looks at CRM trends and case studies over the past seventy years to gauge how politics in various places have changed as the American electorate has diversified *Contested Transformation* Carol

Hardy-Fanta,Pei-te Lien,Dianne Pinderhughes,Christine Marie Sierra,2016-10-25 Contested Transformation constitutes the first comprehensive study of racial and ethnic minorities holding elective office in the United States at the beginning of the twenty first century Building on data from the Gender and Multicultural Leadership GMCL National Database and Survey it provides a baseline portrait of Black Latino Asian American and American Indian elected officials the women and men holding public office at national state and local levels of government Analysis reveals commonalities and differences across race and gender groups on their backgrounds paths to public office leadership roles and policy positions Challenging mainstream political science theories in their applicability to elected officials of color the book offers new understandings of the experiences of those holding public office today Gains in political leadership and influence by people of color are transforming the American political landscape but they have occurred within a contested political context one where struggles for racial and gender equality continue *Exploring the C-SPAN Archives* Robert X. Browning,2015-11-15 Exploring the C SPAN Archives is a collection of path breaking research studies that use video drawn from the C SPAN Archives The book based on the papers presented at a November 2014 conference includes chapters that explore issues in presidential debates minority representation the presentation of the first ladies stem research and innovative ways to analyze video The book is divided into five parts Part 1 consists of an overview of and common scholarship using the C SPAN Archives and how this research advances the conversation after previously published studies Featured are the ways in which the collection is indexed and tips on how individuals can find particular materials This section is essential for increased scholarship and pragmatic applications Part 2 contains applied research using the video collection Topics in this section include a look at oral histories of minority members of Congress an analysis of presidential debates and the presentation style of Michelle Obama Part 3 is focused on STEM research including concepts and contradictions in the debate over STEM initiatives expertise and evidence in science presentations in the C SPAN Archives and the framing of technology issues in a C SPAN television series The Communicators Part 4 presents innovative research using C SPAN and new computer technology Two scholars take different technical approaches to evaluate polarization and communication using audio levels and video images Finally in Part 5 David Caputo presents ideas on the value of massive open online courses MOOCs using C SPAN and reflects on the use of C SPAN for citizen education in what he terms the postdigital world Additionally Patrice Buzzanell contributes a reflective essay on the future directions of research using the C SPAN Archives based on the essays in this volume Why Aren't They There? Didier Ruedin,2014-01-01 Why Aren t They There is a comprehensive study of political representation in a cross national format making a cross country comparison of the representation of women ethnic groups and policy positions It includes an analysis of the representation of women over time and presents a critical view of the effectiveness of quotas Using new data on ethnic groups in legislatures it makes a significant step forward in the analysis of political representation The representation of issue positions is examined in eight policy domains and the book s

systematic approach allows a groundbreaking examination of how different forms of representation women ethnic groups issue positions are interlinked Didier Ruedin examines aspects unattainable in studies focusing only on a single form of representation The result is a comprehensive understanding of political representation and important and policy relevant insights for electoral engineering
